US Army Corps of Engineers
District: CEMVN

Distribution Liability: This data represents the results of data acquisition and processing conducted by the U.S. Army Corps of Engineers and is fully suitable for the purpose for which it was intended at the time of its production. However, no warranty is made as to the accuracy of any of the specifications of the data for other than its intended purpose.

Data Constraints: Hydrographic survey data is subject to change after the survey is completed due to natural and man-made factors such as storms, and dredging and navigation vessel movement. The U.S. Army Corps of Engineers does not guarantee that the data will be suitable for navigation purposes or other purposes for which it was not intended. Data is subject to revision after the date of the survey. The data is intended by the U.S. Army Corps of Engineers to be used by qualified navigation interpreters.

Data Liability: Access Constraints: This United States Government facilities/property/equipment is for authorized use only. Unauthorized access or use may result in civil or criminal penalties. Any information on this system may be intercepted, recorded, and disclosed to anyone inside or outside the United States. By accessing this system, you consent to these conditions. The Corps of Engineers does not guarantee that the data will be suitable for other purposes than those for which it was intended. The Corps of Engineers does not guarantee that the data will be suitable for navigation purposes or other purposes for which it was not intended. Data is subject to revision after the date of the survey. The data is intended by the U.S. Army Corps of Engineers to be used by qualified navigation interpreters.

16 September 2024

Sheet Reference Number

2 of 16

Revision Number: 4.2-.0039630

VICINITY MAP

LEGEND

- Federal Navigation Channel
- Federal Navigation Center Line
- As-built Pipeline/Cable
- Unconfirmed Pipeline/Cable
- Project Depth Contour
- Cable Area
- Placement Area
- Anchorage Area
- Obstruction Point
- Wrecks-Submerged
- Borrow Area
- Shoalest Sounding**
- Beacon, General
- Red Navigation Buoy
- Green Navigation Buoy
- -12' and above
- -12' to -15'
- -15' to -18'
- -18' to -20'
- -20' and below
- 3 Fluff Thickness*

Gage Reading:	EUGENE STAFF: 2.0 MLG AVG
Sea Conditions:	1 FT
Vessel Name:	OB169
Survey Type:	CONDITION
Sounding Frequency***:	LOW

Feet: 0, 800, 1,600, 2,400, 3,200

NOTES:

Horizontal Coordinate System:
North American Datum of 1983 (NAD83), projected to the State Plane Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.

Vertical Datum:
Soundings are shown in feet and indicate depths below Mean Low Gulf Datum (MLG).
Datum Relationships for the gage 8860 as of August 2013:
0.0' NAVD88 = 0.6' MLLW = 1.5' MLG

Distances on the Atchafalaya River are shown at 1 mile intervals.

The location of navigation aids are base on and provided by the U.S. Coast Guard.

2019 Aerial Photography data source: P.A.R. LLC. (1998 DOQQ imagery in green).

Reference is N.O.A.A. Navigation Chart No. 11354.

* Difference between high and low frequency elevations where greater than 1.0'.

** Shoalest Sounding per Quarter per Reach.

*** High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (20 kHz) survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.
