NOTES:

Horizontal Coordinate System:
North American Datum of 1983 (NAD83), projected to the State Plane Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.

Vertical Datum:
Soundings are shown in feet and indicate depths below Low Water Reference Plane 2007 (NAVD).

Distances on the Mississippi River, above and below Head of Passes are shown at 1 mile intervals.

The location of navigation aids are base on and provided by the U.S. Coast Guard and USACE crew.

2015 Aerial Photography data source: NAIP, USDA-FSA-APFO Aerial Photography Field Office.

Reference is N.O.A.A. Navigation Chart No. 11370.

** Shoalest Sounding per Quarter per Reach.

*** High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (20 kHz) survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.

DISCLAIMER
Access Constraints: The United States Government furnishes these data and information as a courtesy to the Corps of Engineers and does not assume responsibility for its accuracy, completeness, or suitability for any purpose. The Corps of Engineers expressly disclaims any implied warranties of merchantability and fitness for a particular purpose. Any use of the information and the data furnished. The United States shall be held harmless from any liability arising from any such use. Under no liability whatsoever on any person by reason of any use made thereof. It is agreed that with the acceptance of this information the recipient fully agrees not to represent these data to anyone as other than the most current information available and to indemnify the Corps of Engineers from any liability arising from the use of these data by others without also transferring this Disclaimer.

The information depicted on this map represents the results of a survey conducted on the date indicated and can only be considered to represent the general conditions existing at that time.

Distribution Liability: The data represents the results of data collection and processing performed by the Corps of Engineers and is only valid for its intended use, content, time and accuracy of the data. The Corps of Engineers assumes no responsibility for any of the application of the data for other than its intended purpose.

Data Constraints: Hydrographic survey data is subject to change due to natural shoaling and scouring processes. The U. S. Army Corps of Engineers accepts no responsibility for changes in activity and natural shoaling and scouring processes. The U. S. Army Corps of Engineers assumes no responsibility for changes in activity and natural shoaling and scouring processes. The U. S. Army Corps of Engineers assumes no responsibility for any publication. This data is intended for U. S. Army Corps of Engineers' internal use. Product improvement based on any publication.
