Gage Reading: 1.34 AV MLG
Sea Conditions: 2-4'
Vessel Name: VALENTOUR
Survey Type: CONDITION
Sounding Frequency***: LOW

Feet
0 800 1,600 2,400 3,200

NOTES:
Horizontal Coordinate System:
North American Datum of 1983 (NAD83), projected to the State Plane Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.

Vertical Datum:
Soundings are shown in feet and indicate depths below Mean Low Gulf Datum (MLG).
Datum Relationships for the gage 8860G as of August 2013:
0.0' NAVD88 = 0.6' MLLW = 1.5' MLG

Distances on the Atchafalaya River are shown at 1 mile intervals.

The location of navigation aids are base on and provided by the U.S. Coast Guard.

2013 Aerial Photography data source: GEOCLIP, Atlantic Group, LLC. (1998 DOQQ imagery in green).

Reference is N.O.A.A. Navigation Chart No. 11354.

* Difference between high and low frequency elevations where greater than 1.0'.

** Shoalest Sounding per Quarter per Reach.

*** High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (20 kHz) survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.

US Army Corps of Engineers
District: CEMVN

Distribution Limitation: The data represents the results of data collection and analysis performed by the Corps of Engineers (USACE) and is only suitable for its intended purpose and scale. Data is provided "as is" and "as available" without warranty of any kind, either expressed or implied, including but not limited to, the implied warranties of merchantability and fitness for a particular purpose. The entire risk as to the quality and performance of the data is borne by the recipient.

Data Completeness: Hydrographic survey data is subject to change and may not reflect all obstructions to navigation, such as sunken vessels, floating and partially submerged vessels, and floating debris. The U.S. Army Corps of Engineers (USACE) does not guarantee that all such obstructions will be depicted on this data product. This data is provided by the U.S. Army Corps of Engineers (USACE) "as is" and without any warranties as to performance or merchantability.

Data Liability:
Access Constraints: The United States Government functions cannot be interfered with or restricted. Equal opportunity to all users must be maintained. Unofficial use of government data is prohibited and may be subject to civil and criminal penalties without notice. The United States shall not be liable for any damages, including but not limited to, direct, indirect, special, consequential, or other damages, including but not limited to, loss of profits or revenue, loss of anticipated profits or revenue, loss of use or production, loss of contracts, or loss of goodwill, whether in contract, tort (including negligence), or otherwise in connection with the use, ability to use, or inability to use the data, or any data derived or produced from the data, or any data supplied or contracted for in lieu thereof or in addition thereto, regardless of the fault, tort (including negligence), or otherwise of the United States Government or any officer or employee thereof, based on, or arising from, the use of this data or any other data furnished in connection therewith, or based on any claim by any third party or third party beneficiary against the United States Government or any officer or employee thereof.
