Gage Reading: EUGENE ISLAND: 2.78 MLG AVG.
Sea Conditions: 0-1 FT
Vessel Name: M/V VALENTOUR
Survey Type: CONDITION
Sounding Frequency***: LOW

Feet
0 800 1,600 2,400 3,200

NOTES:
Horizontal Coordinate System:
North American Datum of 1983 (NAD83), projected to the State Plane Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.

Vertical Datum:
Soundings are shown in feet and indicate depths below Mean Low Gulf Datum (MLG).
Datum Relationships for the gage 8760922 as of August 2013:
0.0' NAVD88 = 0.6' MLLW = 1.5' MLG

Distances on the Atchafalaya River are shown at 1 mile intervals.

The location of navigation aids are base on and provided by the U.S. Coast Guard.

2013 Aerial Photography data source: GEOCLIP, Atlantic Group, LLC. (1998 DOQQ imagery in green).

Reference is N.O.A.A. Navigation Chart No. 11354.

* Difference between high and low frequency elevations where greater than 1.0'.

** Shoalest Sounding per Quarter per Reach.

*** High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (20 kHz) survey data penetrates through this "fluff" layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.

US Army Corps of Engineers
District: CEMVN

DISCLAIMER
Distribution Liability: The data represents the results of data collection and analysis at the time and for the purposes noted. It may not be suitable for other purposes or at other times. The District makes no warranty, expressed or implied, as to the accuracy, completeness, or timeliness of the data shown hereon, nor does it assume any liability arising from any use of the data or the application of the data for other than its intended purpose.

Data Constraints: Hydrographic survey data is subject to change due to factors such as, but not limited to, weather, currents, tides, shoaling, and sediment transport and movement. The U.S. Army Corps of Engineers makes no warranty, expressed or implied, as to the accuracy of the data contained in the survey, or its suitability for any purpose other than that for which it was intended. The data is intended for U.S. Army Corps of Engineers use only. Other agencies and organizations use this data at their own risk.

DISCLAIMER
Access Constraints: The United States Government facilities, equipment, and services are provided for the conduct of official business. Unauthorized access is prohibited. Unauthorized users are subject to prosecution. The United States shall not be liable for any damages suffered as the result of using, relying upon, or interfering with the data furnished. The United States shall not be responsible for any damages resulting from the unofficial, unauthorized, improper, or inadvertent use of the data furnished. The United States shall not be liable for any damages suffered as the result of using, relying upon, or interfering with the data furnished and you by your use of these data to others without also transferring this Disclaimer.

The data represented on this chart may be a compilation of a survey conducted on the date indicated and may only be considered current on that date.
