NOTES:

Horizontal Coordinate System:
North American Datum of 1983 (NAD83), projected to the State Plane Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.

Vertical Datum:
Soundings are shown in feet and indicate depths below Low Water Reference Plane 2007 (NAVD).

Distances on the Mississippi River, above and below Head of Passes are shown at 1 mile intervals.

The location of navigation aids are base on and provided by the U.S. Coast Guard and USACE crew.

2015 Aerial Photography data source: NAIP, USDA-FSA-APFO Aerial Photography Field Office.

Reference is N.O.A.A. Navigation Chart No. 11370.

** Shoalest Sounding per Quarter per Reach.

*** High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (20 kHz) survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.

US Army Corps of Engineers
District: CEMVN

Distribution Liability: The data represents the results of data collection and analysis performed by Army Corps of Engineers personnel, and is provided for general information purposes. As it is only valid for its intended use, content, time and accuracy of the data, the Army Corps of Engineers accepts no responsibility for any of any of the application of the data for other than its intended purpose.

Data Constraints: Hydrographic survey data is subject to change due to environmental factors such as storms, seasonal shoaling, tidal activity and natural shoaling and scouring processes. The U. S. Army Corps of Engineers accepts no responsibility for changes in the data after the date and time of the survey as shown on this publication. This data is intended for U. S. Army Corps of Engineers' internal use. Private companies should contact a hydrographic survey firm.

DISCLAIMER
Access Constraints: The United States Government furnishes these data and the USE accepts and uses them with the express understanding that the United States Government makes no warranties, expressed, or implied concerning the accuracy, completeness, reliability, or suitability of these data for any purpose. Neither the information and the data furnished. The United States shall be under no liability whatsoever to any person by reason of any use made thereof. The United States Government does not warrant that the recipient fully agrees not to represent these data to anyone as other than the United States Government product and to clearly describe these data to others without also transferring the Disclaimer.

The information depicted on the map represents the results of a survey conducted on the date indicated and can only be considered to represent the general conditions existing at that time.
