NOTES:

Horizontal Coordinate System:
North American Datum of 1983 (NAD83), projected to the State Plane Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.

Vertical Datum:
Soundings are shown in feet and indicate depths below Low Water Reference Plane 2007 (NGVD).

Distances on the Mississippi River, above and below Head of Passes are shown at 1 mile intervals.

The location of navigation aids are base on and provided by the U.S. Coast Guard and USACE crew.

2010 Aerial Photography data source: NAIP, USDA-FSA-APFO Aerial Photography Field Office.

Reference is N.O.A.A. Navigation Chart No. 11370.

** Shoalest Sounding per Quarter per Reach.

*** High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (20 kHz) survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.

DISCLAIMER
Access Constraints: The United States Government furnishes these data and information as a courtesy to the recipient and assumes no liability for the use thereof within the express limitations and restrictions of the data and information and the data furnished. The United States shall be under no liability whatsoever to any person by reason of any use made thereof. The United States does not warrant the accuracy, adequacy, completeness, or usefulness of the data furnished, nor does it assume any liability for the use of the data furnished. The United States shall be under no liability whatsoever to any person by reason of any use made thereof. The United States does not warrant the accuracy, adequacy, completeness, or usefulness of the data furnished, nor does it assume any liability for the use of these data by others without also transferring this Disclaimer.

The information depicted on the map represents the results of a survey conducted on the date indicated and can only be considered to represent the general conditions existing at that time.

Distribution Liability: The data represents the results of data collection and analysis performed by the U.S. Army Corps of Engineers activity and indicates the general existing conditions. As such, it is only valid for its intended use, content, time and accuracy. The U.S. Army Corps of Engineers accepts no responsibility for changes in the environment or for any other use of the data or for the application of the data for other than its intended purpose.

Data Constraints: Hydrographic survey data is subject to change due to environmental factors such as storms, dredging, navigation activity, and natural shoaling and scouring processes. The U. S. Army Corps of Engineers accepts no responsibility for changes in the environment or for any other use of the data after the date of publication. This data is intended for U. S. Army Corps of Engineers' internal use. Private business should not rely solely upon it.
