NOTES:

Horizontal Coordinate System:
North American Datum of 1983 (NAD83), projected to the State Plane Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.

Vertical Datum:
Soundings are shown in feet and indicate depths below Low Water Reference Plane 2007 (NAVD).

Distances on the Mississippi River, above and below Head of Passes are shown at 1 mile intervals.

The location of navigation aids are base on and provided by the U.S. Coast Guard and USACE crew.

2015 Aerial Photography data source: NAIP, USDA-FSA-APFO Aerial Photography Field Office.

Reference is N.O.A.A. Navigation Chart No. 11370.

** Shoalest Sounding per Quarter per Reach.

*** High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (20 kHz) survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.

US Army Corps of Engineers
District: CEMVN

Distribution Liability: The data represents the results of data collected by the U.S. Army Corps of Engineers activity and indicates the general existing conditions. As such it is only valid for its intended use, content, time and accuracy of the application of the data for other than its intended purpose.

Data Constraints: Hydrographic survey data is subject to change due to natural and man-made influences such as storms, dredging activity and natural shoaling and scouring processes. The U. S. Army Corps of Engineers accepts no responsibility for changes in the data after the date of publication. This data is intended for U. S. Army Corps of Engineers internal use. Private business should not rely upon it.

DISCLAIMER
Access Constraints: The United States Government furnishes these data and information as a courtesy and in cooperation with the express understanding that no warranties, either expressed or implied, are made concerning the accuracy, completeness, reliability, or suitability of these data and information for any purpose. Under no liability whatsoever to any person by reason of any use made thereof, which may be made hereof, nor does the recipient fully agrees not to represent these data to anyone as other than a product of the U.S. Government. Also, the recipient agrees to make these data to others without also transferring this Disclaimer.

The information depicted on the map represents the results of a survey conducted on the date indicated and can only be considered a representation of the general condition existing at that time.
