LWRP:	1.2
Gage Reading:	D:22.2 R:16.5 USED:19.7 NAVD88
Sea Conditions:	CALM
Vessel Name:	M/V LAFOURCHE
Survey Type:	CS
Sounding Frequency***:	HIGH

Feet
0 500 1,000 1,500 2,000 2,500

NOTES:

Horizontal Coordinate System:
North American Datum of 1983 (NAD83), projected to the State Plane Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.

Vertical Datum:
Soundings are shown in feet and indicate depths below Low Water Reference Plane 2007 (NAVD).

Distances on the Mississippi River, above and below Head of Passes are shown at 1 mile intervals.

The location of navigation aids are base on and provided by the U.S. Coast Guard and USACE crew.

2010 Aerial Photography data source: NAIP, USDA-FSA-APFO Aerial Photography Field Office.

Reference is N.O.A.A. Navigation Chart No. 11370.

** Shoalest Sounding per Quarter per Reach.

*** High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (20 kHz) survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.

US Army Corps of Engineers
District: CEMVN

Distribution Liability: The data represents the results of data collection and analysis performed by the Corps of Engineers activity and indicates the general existing condition. As such, it is only valid for its intended use, content, time and accuracy as specified by the activity. The Corps of Engineers assumes no liability for any of the application of the data for other than its intended purpose.

Data Constraints: Hydrographic survey data is subject to change during and after the survey process. Users should contact the Corps activity and natural shoaling and scouring processes. The U. S. Army Corps of Engineers accepts no responsibility for changes in the environment that occur after the survey has been completed, or for any publication. This data is intended for U. S. Army Corps of Engineers internal use. Private business should contact a qualified source.

DISCLAIMER
Access Constraints: The United States Government furnishes these data and the US Government assumes them with the express understanding that they are subject to the disclaimer of warranties expressed, or implied concerning the accuracy, completeness, reliability, usability, or suitability for any purpose of the data or information and the data furnished. The United States shall be under no liability whatsoever to any person by reason of any use made thereof. It is agreed that the recipient of the data or information and the recipient fully agrees not to represent these data to anyone as other than government data. The recipient agrees to indemnify and hold harmless the United States from any claim arising from the use of these data by others without also transferring this Disclaimer.

The information depicted on this map represents the results of a survey conducted on the date indicated and can only be considered to represent the general condition existing at that time.
