NOTES:

Horizontal Coordinate System:
North American Datum of 1983 (NAD83), projected to the State Plane Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.

Vertical Datum:
Soundings are shown in feet and indicate depths below Low Water Reference Plane 2007 (NGVD).

Distances on the Mississippi River, above and below Head of Passes are shown at 1 mile intervals.

The location of navigation aids are base on and provided by the U.S. Coast Guard and USACE crew.

2010 Aerial Photography data source: NAIP, USDA-FSA-APFO Aerial Photography Field Office.

Reference is USACE IENC U35LM236.

** Shoalest Sounding per Quarter per Reach.

*** High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (20 kHz) survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.

US Army Corps of Engineers
District: CEMVN

DISCLAIMER
Access Constraints: The United States Government furnishes these data and the US Coast Guard makes them available with the express understanding that no warranties of any kind, either expressed or implied concerning the accuracy, completeness, reliability, or suitability of these data for any purpose, including navigation information and the data furnished. The United States shall be under no liability whatsoever to any person by reason of any use made thereof. Except for the foregoing, the United States hereby offers these data to anyone as other navigation information data and disclaims any liability regarding its further use or dissemination. Nor can any person convey to others more than he himself may convey. The United States does not guarantee that the data will be used for any purpose or that the data will be suitable for any purpose.
