Gage Reading:	2.7 MLLW @ VENICE @ 1315
Sea Conditions:	CALM
Vessel Name:	JOHN BOPP
Survey Type:	CONDITION, SB
Sounding Frequency***:	LOW

Feet: 0 500 1,000 1,500 2,000 2,500

NOTES:

Horizontal Coordinate System:
North American Datum of 1983 (NAD83), projected to the State Plane Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.

Vertical Datum:
Soundings are shown in feet and indicate depths below Mean Lower Low Water (MLLW, 07-11).
Datum Relationships for gage 01525 as of July 2015:
0.0' NAVD88 = -0.3' MLLW = 3.20' MLG

Distances on the Mississippi River, above and below Head of Passes are shown at 1 mile intervals.

The location of navigation aids are base on and provided by the U.S. Coast Guard.

2016 Aerial Photography data source: Precision Aerial Reconnaissance, LLC (1998 DOQQ in green)

Reference is N.O.A.A. Navigation Chart No. 11361.

** Shoalest Sounding per Quarter per Reach.

*** High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (24 kHz) survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.

US Army Corps of Engineers
District: CEMVN

Distribution Liability: The data represents the results of data collection and analysis performed by the Corps of Engineers activity and indicates the general existing conditions. As such, it is only valid for its intended use, content, time and accuracy of the data at the time of the survey. The Corps disclaims all liability of any of the application of the data for other than its intended purpose.

Data Constraints: Hydrographic survey data is subject to change without notice due to subsequent navigation, dredging, or other activity and natural shoaling and scouring processes. The U. S. Government makes no warranties, expressed or implied, concerning the accuracy, completeness, reliability, or suitability of the information provided herein in the hydrographical conditions which develop after the date of publication. This data is intended for U. S. Army Corps of Engineers' internal use. Present mariners should use the latest nautical chart.

DISCLAIMER
Access Constraints: The United States Government furnishes this map/chart/data/information/product/service without warranties of any kind. It is provided on the express understanding that the US Government makes no warranties, expressed, or implied concerning the accuracy, completeness, reliability, or suitability of the information provided herein in the hydrographical conditions which develop after the date of publication. The United States shall be held harmless for any injuries or damages resulting from suit made thereof. These data belong to the Government. Therefore the recipient fully agrees not to represent these data to anyone as other than government data or to represent any products derived from these data to others without also transferring this Disclaimer.

The information depicted on this map represents the results of a survey conducted on the date indicated and can only be considered as expressed the general condition existing at that time.
