Gage Reading: 1.20 MLLW @ HEAD OF PASSES @ 0945
Sea Conditions: CALM, FLUFF
Vessel Name: JOHN BOPP
Survey Type: CONDITION, SB
Sounding Frequency***: LOW

Feet
0 500 1,000 1,500 2,000 2,500

NOTES:

Horizontal Coordinate System:
North American Datum of 1983 (NAD83), projected to the State Plane Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.

Vertical Datum:
Soundings are shown in feet and indicate depths below Mean Lower Low Water (MLLW, 07-11).
Datum Relationships for gage 01545 as of July 2015:
0.0' NAVD88 = -0.18' MLLW = 3.32' MLG

Distances on the Mississippi River, above and below Head of Passes are shown at 1 mile intervals.

The location of navigation aids are base on and provided by the U.S. Coast Guard.

2016 Aerial Photography data source: Precision Aerial Reconnaissance, LLC (1998 DOQQ in green)

Reference is N.O.A.A. Navigation Chart No. 11361.

** Shoalest Sounding per Quarter per Reach.

*** High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (24 kHz) survey data normally penetrates through this "fluff" layer to depict elevations of consoldiated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.

US Army Corps of Engineers
District: CEMVN

Distribution Liability: The data represents the results of data collection and analysis at the time and for the purposes of activity and indicates the general existing conditions. As such, it is only valid for its intended use; content, time and accuracy of the data for other than its intended purpose may require verification or updating. The U.S. Government does not assume liability for any decisions made or actions taken based on the data provided.

Data Constraints: Hydrographic survey data is subject to change without notice due to shoaling and scouring processes. The U.S. Government does not assume liability for any decisions made or actions taken based on the hydrographical conditions which develop after the date of publication. This data is intended for U.S. Army Corps of Engineers' internal use. Present revisions based on this survey report.

DISCLAIMER
Access Constraints: The United States Government furnishes this map/chart/data/information/product/service as a courtesy to users and makes no warranties, expressed, or implied concerning the accuracy, completeness, reliability, or suitability of the information, or of any other information and the data furnished. The United States shall be held harmless from any liability or damages resulting from decisions made thereof. These data belong to the Government. Therefore the recipient fully agrees not to represent these data to anyone as other than Government data. The recipient agrees not to resell these data to others without also transferring this Disclaimer.

The information depicted on this map represents the results of a survey conducted on the date indicated and can only be considered as representing the general conditions existing at that time.
