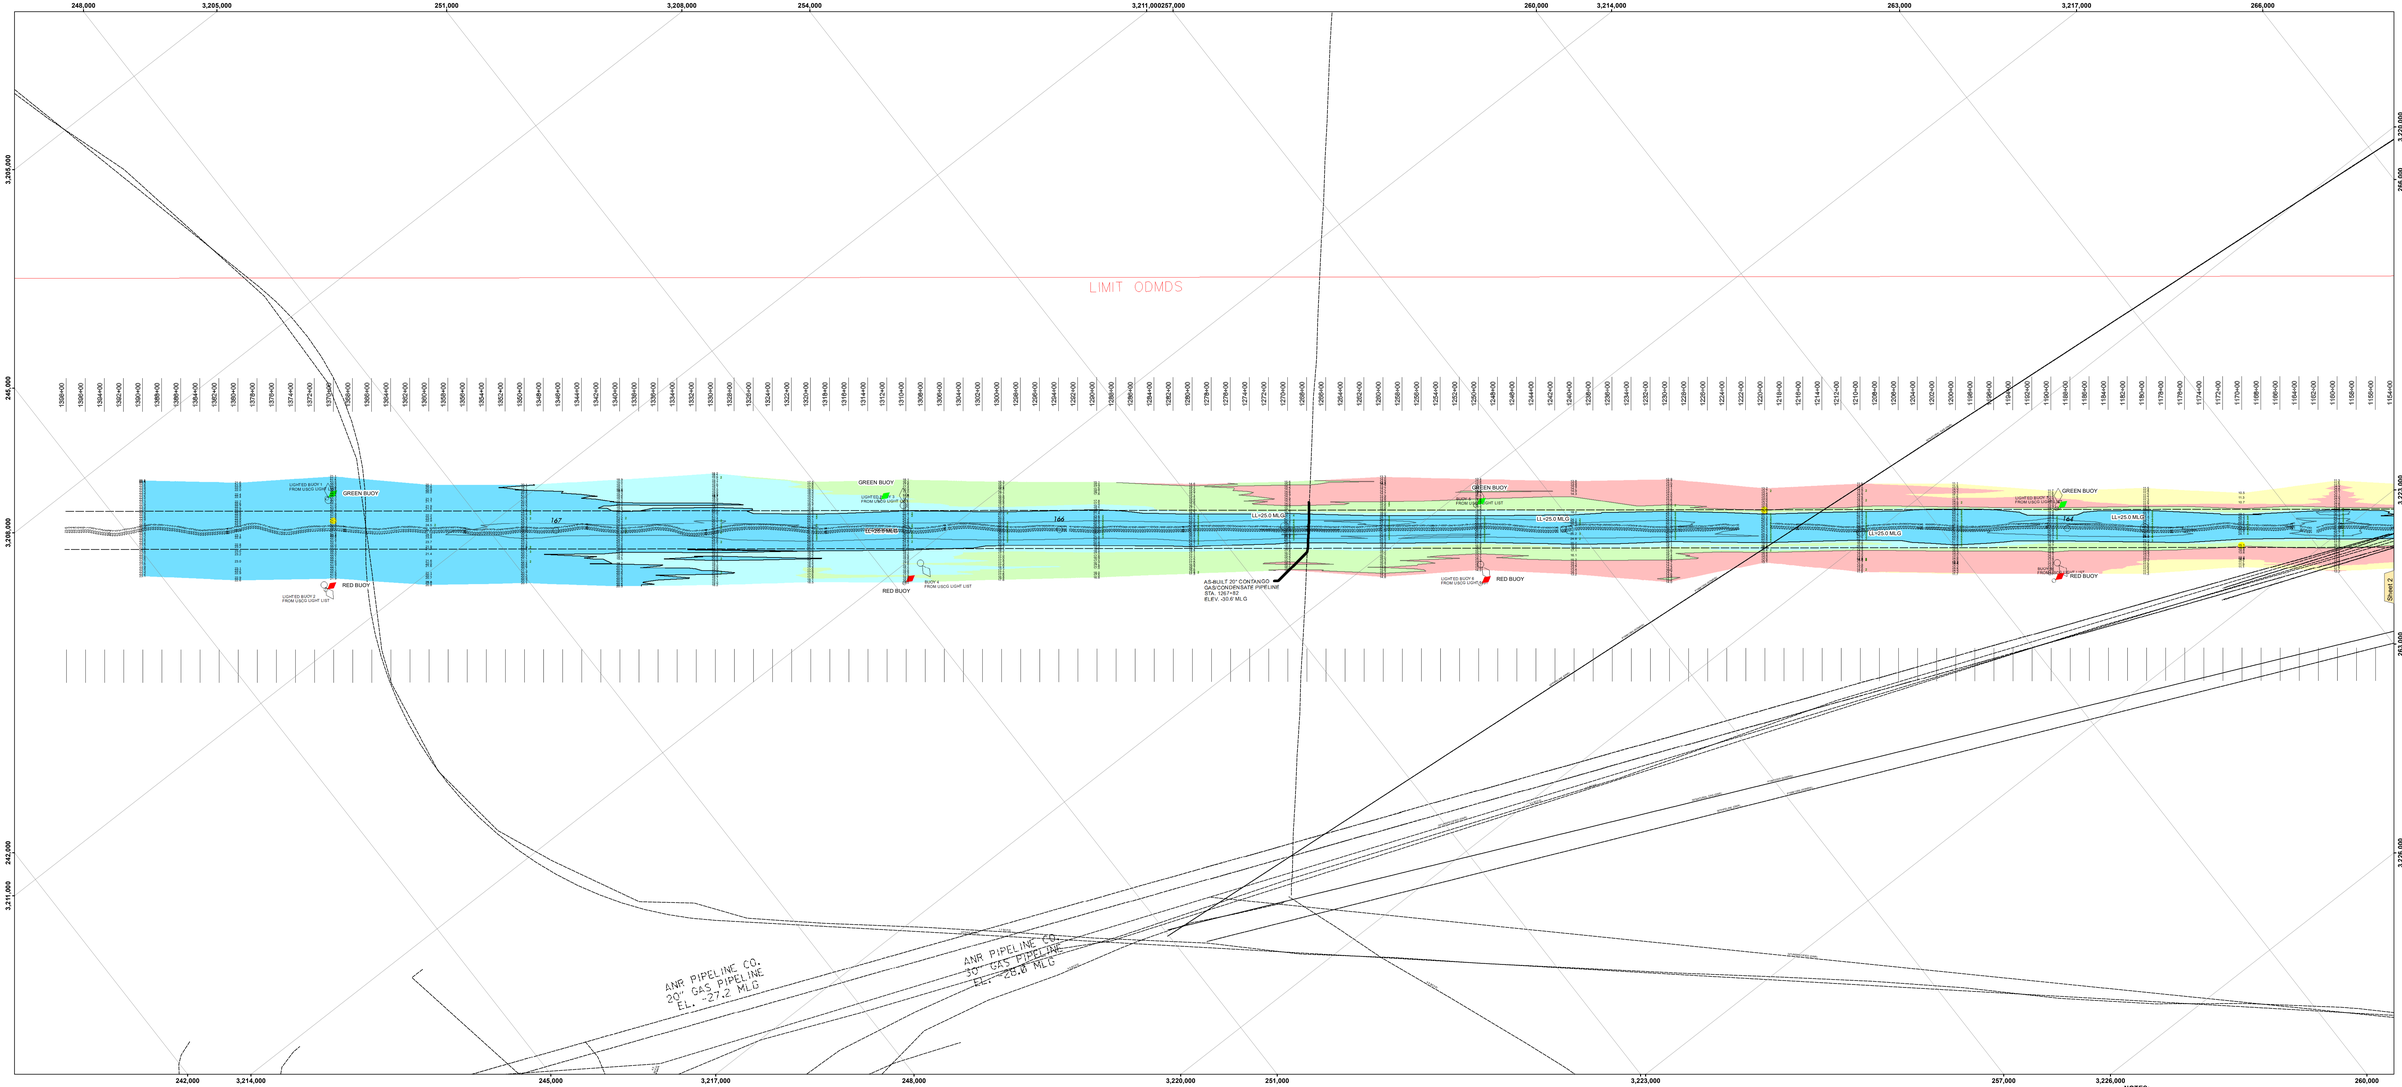
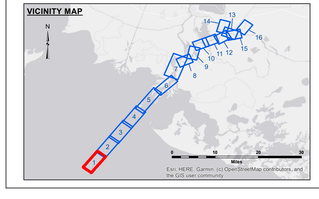
U.S. ARMY





LEGEND

- Federal Navigation Channel
- Federal Navigation Center Line
- As-built Pipeline/Cable
- Unconfirmed Pipeline/Cable
- Project Depth Contour
- Cable Area
- Placement Area
- Anchorage Area
- Obstruction Point
- Wrecks-Submerged
- Borrow Area
- Shoalest Sounding**
- Beacon, General
- Red Navigation Buoy
- Green Navigation Buoy
- -12' and above
- -12' to -15'
- -15' to -18'
- -18' to -20'
- -20' and below
- 3 Fluff Thickness*

Gage Reading:	EUGENE NOAA: 0.97 MLG AVG
Sea Conditions:	0-1 FT
Vessel Name:	VALENTOUR
Survey Type:	CS
Sounding Frequency***:	LOW

Feet
0 800 1,600 2,400 3,200

NOTES:
Horizontal Coordinate System:
North American Datum of 1983 (NAD83), projected to the State Plane Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.

Vertical Datum:
Soundings are shown in feet and indicate depths below Mean Low Gulf Datum (MLG).
Datum Relationships for the gage 88600 as of August 2013:
0.0' NAVD88 = 0.6' MLLW = 1.5' MLG

Distances on the Atchafalaya River are shown at 1 mile intervals.

The location of navigation aids are base on and provided by the U.S. Coast Guard.

2019 Aerial Photography data source: P.A.R. LLC. (1998 DOQQ imagery in green).

Reference is N.O.A.A. Navigation Chart No. 11354.

* Difference between high and low frequency elevations where greater than 1.0'.

** Shoalest Sounding per Quarter per Reach.

*** High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (20 kHz) survey data normally penetrates through this "fluff layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.

US Army Corps of Engineers
District: CEMVN

Distribution Liability: The data represents the results of data collection and processing at the time and under the conditions described in the publication. Users are advised to read the publication, to verify conditions that may affect the data, and to exercise professional judgment in the use of the data. The Government assumes no liability for any decisions made or actions taken by any party as a result of the publication of the data for other than its intended purpose.

Data Constraints: Hydrographic survey data is subject to change over time due to natural processes (shoaling, accretion, erosion, scour), and dredging and removing (maintaining). Thus, it is advised that users consult the most recent publication of survey data prior to any navigation. This data is intended for U.S. Army Corps of Engineers navigation purposes only.

GIS Labels:
Acres Constraints: The United States Government furnishes this map "as is" without warranty of any kind, either expressed or implied, including but not limited to, any warranty of merchantability or warranty of fitness for a particular purpose. The United States Government shall not be liable for any special, indirect or consequential damages attributed to the reliance upon any map information, the inability to use any map, or any error in, or omission from, the map. The user is specifically advised to save harmless the United States Government and its employees from any loss, cost, damage, claim or liability arising out of reliance upon these data or data derived therefrom or arising out of the publication or other distribution thereof by reliance upon these data by others without step ahead transferring this Disclaimer.

Any data disseminated to the public may be redistributed by a third party only if the third party determines and states explicitly that no warranty (implied or otherwise) is made regarding the accuracy of the data when used separately from the publication. This data is intended for use as a planning tool only.
