

NOTES: 330,000

Horizontal Coordinate System:
North American Datum of 1983 (NAD83), projected to the State Plane
Coordinate System (SPCS), Louisiana South Zone. Distances units in U.S. Survey Feet.

Vertical Datum:
Sounding shown in feet and includes depths below Mean Low Gult Datum (MLG).
Datum Relationships for the year 88000 as of August 2013:
0.0' NAVD83 = 0.0' MLGL + 1.5' MLG

Distances on the Atchafalaya River are shown at 1 mile intervals.

The location of navigation aids are base on and provided by the U.S. Coast Guard.

Aerial Photography data source: BUMP 2026 (DOQD 1998 in transparent green)

Reference is N.O.A. Navigation Chart # 11354.

*** Shallowest Sounding per Quarter per Reach.

*** High frequency (20 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff".
Low frequency (2 kHz) survey data normally penetrates through this "fluff" layer to detect conditions of consolidated bottom material.
Low frequency accuracy may vary depending on channel conditions and bathymetric settings.
