

DISCLAIMER

Access Restrictions: The United States Government furnishes this information to the recipient of this document without any understanding that the US Government makes no warranties, express, implied, or otherwise, in this information, or that the recipient, or anyone to whom the recipient may disclose this information, or the United States shall be held responsible for any damages, including consequential damages, that may result from the use of the information and the data furnished. The United States shall be held responsible for the accuracy, completeness, and timeliness of the information and the data made available. These data belong to the Government. Therefore the recipient is not to make any copies of these data, or to transfer these data to others without also transferring this disclaimer.

Distribution Liability: The data represents the results of data collection and analysis conducted by the recipient of this activity and indicated the general operating conditions. As such, the recipient of this information is responsible for the accuracy, completeness, and timeliness of the information and the data of any of the application of the data for other than its intended purpose.

Hydrographic Survey Data: Hydrographic survey data is subject to change due to several factors including but not limited to changing activity and natural sounding and sounding processes. The U.S. Navy Hydrographic Office is responsible for the accuracy, completeness, and timeliness of the hydrographic conditions which develop after the date of the hydrographic survey. The recipient of this information is responsible for the accuracy, completeness, and timeliness of the information. Prudent mariners should not solely upon the information.

5.26.07.27, 5.26.07.28

- LEGEND**

- - - Federal Navigation Channel	○ ○ Cable Area	[] Borrow Area	□ -6' and above
— Federal Navigation Center Line	▭ Placement Area	● Shoalest Sounding**	■ -6 to -8
— As-built Pipeline/Cable	⊠ Anchorage Area	★ Beacon, General	■ -8 to -10
..... Unconfirmed Pipeline/Cable	⊗ Obstruction Point	★ Beacon, General	■ -10 to -12
— Project Depth Contour	✈ Wrecks-Submerged	★ Beacon, General	■ -12' to -15'
		★ Beacon, General	■ -15' to -18'
		★ Beacon, General	■ -18' to -20'
		★ Beacon, General	■ -20' and below
		★ Beacon, General	

NOTES:
Horizontal Coordinate System:
North American Datum of 1983 (NAD83), projected to the State Plane
Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.

Vertical Datum:
Soundings are shown in feet and indicate depths below Mean Low Gull Datum (MLG).
Datum Relationships for Lower Atchafalaya River at Morgan City (03780) as of 2025:
0.0' NAVD88 (2009.55) = 2.19' MLG

The location of navigation aids are base on and provided by the U.S. Coast Guard.

2023 Aerial Photography data source: NAIP.

Reference is N.O.A.A. Navigation Chart No. 11355.

** Shoalest Sounding per Quarter per Reach.

*** High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (200 kHz) data normally penetrates through this "fluff" layer to depict elevations of consolidated material. Low frequency accuracies may vary depending on channel conditions and false bottoms.
