Access Constraints: The United States Government furnishes this information as is without warranty of any kind. It is the user's responsibility to understand that the US Government makes no warranties, express or implied, including any warranty of accuracy, completeness, reliability, or availability for any purpose. The user is responsible for the actual use of the information and the data furnished. The United States shall be held harmless for any damages, including consequential damages, that may result from the use of the information. These data belong to the Government. Therefore the user is not authorized to make any copies of the information or to transfer them to others without also transferring this Disclaimer.

Distribution Liability: The data represents the results of data collected from a variety of sources and may not be used to represent the general condition existing at a particular time and place. The user is responsible for the actual use of the information and the data furnished. The United States shall be held harmless for any damages, including consequential damages, that may result from the use of the information. These data belong to the Government. Therefore the user is not authorized to make any copies of the information or to transfer them to others without also transferring this Disclaimer.

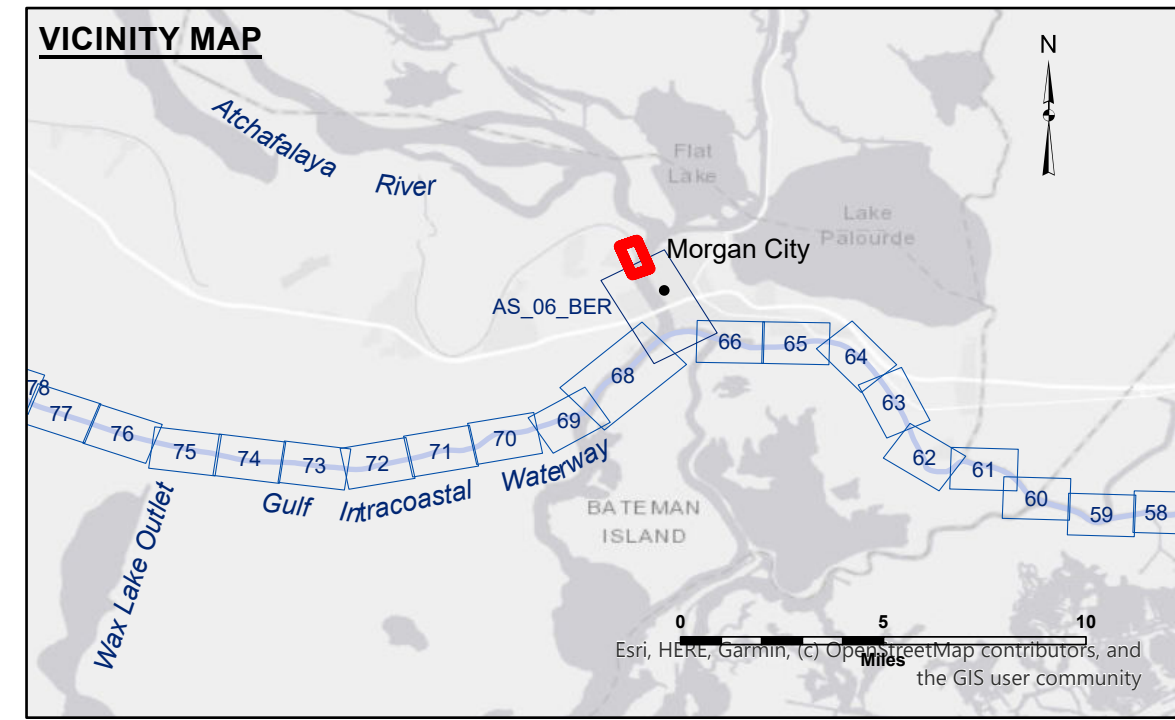

Hydrographic Survey Data: Hydrographic survey data is subject to change rapidly due to several factors including but not limited to dredging activity and natural sedimentation and scouring processes. The U.S. Navy Hydrographic Office (NHO) is responsible for the collection and distribution of hydrographic survey data. The data is not intended to represent the general condition existing at a particular time and place. The user is responsible for the actual use of the information and the data furnished. The United States shall be held harmless for any damages, including consequential damages, that may result from the use of the information. These data belong to the Government. Therefore the user is not authorized to make any copies of the information or to transfer them to others without also transferring this Disclaimer.

LEGEND

--- Federal Navigation Channel	○ ○ Cable Area	□ Borrow Area	□ -6' and above
— Federal Navigation Center Line	□ Placement Area	● Shoalest Sounding**	□ -6 to -8
— As-built Pipeline/Cable	□ Anchorage Area	★ Beacon, General	□ -8 to -10
..... Unconfirmed Pipeline/Cable	⊗ Obstruction Point	★ Beacon, General	□ -10 to -12
— Project Depth Contour	✈ Wrecks-Submerged	★ Beacon, General	□ -12' to -15'
		★ Beacon, General	□ -15' to -18'
		★ Beacon, General	□ -18' to -20'
		★ Beacon, General	□ -20' and below
		★ Beacon, General	

NOTES:
Horizontal Coordinate System:
North American Datum of 1983 (NAD83), projected to the State Plane
Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.

Vertical Datum:
Soundings are shown in feet and indicate depths below Mean Low Gulf Datum (MLG).
Datum Relationships for Lower Atchafalaya River at Morgan City (03780) as of 2025:
0.0' NAVD88 (2009.55) = 2.19' MLG

The location of navigation aids are base on and provided by the U.S. Coast Guard.

2023 Aerial Photography data source: NAIP.

Reference is N.O.A.A. Navigation Chart No. 11355.

**** Shoalest Sounding per Quarter per Reach.**

****** High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (2 survey data normally penetrates through this "fluff" layer to depict elevations of consolidated material. Low frequency accuracies may vary depending on channel conditions and bathymetric settings.
