0 500 1,000 1,500 2,000

NOTES:

Horizontal Coordinate System:
North American Datum of 1983 (NAD83), projected to the State Plane Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.

Vertical Datum:
Soundings are shown in feet and indicate depths below Mean Low Gulf Datum (MLG).

The location of navigation aids are base on and provided by the U.S. Coast Guard.

2010 Aerial Photography data source: NAIP. 1998 DOQQ imagery shown in green from USGS.

Reference is N.O.A.A. Navigation Chart No. 11355.

** Shoalest Sounding per Quarter per Reach.

*** High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (20 kHz) survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.

District: CEMVN

DISCLAIMER:
Access Constraints: The United States Government furnishes these data and information on an "as is" basis. The user's use of the data or information, and any conclusion drawn therefrom, is made at the user's own risk. The United States Government and its employees assume no responsibility for the use of the data or information furnished. The United States shall be under no liability whatsoever to any person by reason of any use made thereof. The United States Government does not warrant that the data or information furnished hereunder will be free from defects in content and form. The recipient fully agrees not to represent these data to anyone as other than data received from the United States Government. Any reference to these data to others without also transferring this Disclaimer.

Distribution Liability: The data represents the results of data collection and analysis performed by the U.S. Army Corps of Engineers activity and indicates the general existing conditions. As such, it is only valid for its intended use, context, time and accuracy depicted. The U.S. Army Corps of Engineers accepts no responsibility for any of the application of the data for other than its intended purpose.

Data Constraints: Hydrographic survey data is subject to change due to environmental conditions such as storms, human dredging activity and natural shoaling and scouring processes. The U. S. Army Corps of Engineers accepts no responsibility for changes in the condition of the area subsequent to the date of this publication. This data is intended for U. S. Army Corps of Engineers' internal use. Project conditions should be verified prior to survey.

The information depicted on this map represents the results of a survey conducted on the date indicated and can only be considered to represent the general conditions existing at this time.
