

DISCLAIMER

Access Constraints. The United States Government furnishes this information as is without warranty or guarantee. It does not make any representation as to the accuracy, reliability, or suitability for any particular purpose of the information and the data furnished. The United States shall be held harmless for any damage or loss resulting from the use or misuse of the information. These data are not to be used for any purpose other than that for which the Government provided data. The recipient may not transfer these data to others without also transferring this Disclaimer.

Distribution Liability. The data represents the results of data collection and processing activities conducted by the United States and its agencies and indicated the general existing conditions. As such, the data is not intended to be used for any purpose other than that for which the Government provided data. The recipient may not transfer these data to others without also transferring this Disclaimer.

Hydrographic Survey Data. Hydrographic survey data is subject to change and is not intended for use in charting and navigation. The data is not intended for use in final sounding and sounding purposes. The U.S. Navy is not responsible for any damage or loss resulting from the use or misuse of the data. The data is not intended for use in any other purpose other than that for which the Government provided data. The recipient may not transfer these data to others without also transferring this Disclaimer.

Information Dependent on this Report. The information contained in this report represents the results of a hydrographic survey conducted by the United States Navy. The information depicted on this map represents that data that was collected during the survey and is not intended to be used for any purpose other than that for which the Government provided data. The recipient may not transfer these data to others without also transferring this Disclaimer.

UPPER SHEET 2
CR_02_UPR_20260518_CS
18 May 2026

Sheet
Reference
Number
2 of 53

Revision Number:
5.26.04.06-5.26.04.06

NOTES:

Horizontal Coordinate System:
North American Datum of 1983 (NAD83), projected to the State Plane
Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.

Vertical Datum:
Soundings are shown in feet and indicate depths below Mean Lower Low Water Datum (MLLW).
Datum Relationships for gauge 73550 as of December 2013:
0.0' NAVD83 (OPUS 2010) = 0.6' MLLW = 1.6' MGLG or 0.0' MLLW = 1.0' MGLG

Distances on the Calcasieu River are shown at 1 mile intervals.

The location of navigation aids are base on and provided by the U.S. Coast Guard
and USACE survey crews.

Aerial Photography data source: BUMP 2026 (DOQQ 1998 in transparent green)

Reference is N.O.A. Navigation Chart No. 11339.

* Difference between high and low frequency elevations where greater than 1.0'.

** Shoalest Sounding per Quarter per Reach.

*** High frequency (200 kHz) survey data represents the first signal return at a sounding
location and will include suspended solids, known as "fluff", if present. Low frequency (20 kHz)
survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bot-
tom material. Low frequency accuracies may vary depending on channel conditions and fathometer
settings.
