DISCLAIMER

The United States Government furnishes these data and the recipient accepts them with the express understanding that the US Government makes no warranties, either expressed or implied, as to the accuracy, reliability, usability or suitability for any particular purpose of the information contained herein. The recipient understands that no liability whatsoever to any person by reason of any use made thereof, of these data belonging to the Government, will be made. These data are furnished to the recipient on the understanding that Government provided data. The recipient may not transfer these data to others without also transferring this Disclaimer.

The information depicted on this map represents the results of a hydrographic survey conducted by the US Army Corps of Engineers. The information is not to be considered to represent the general condition existing at that time.

Distribution Policy

The data represents the results of a hydrographic/surveying operation for a specific US Army Corps of Engineers activity and indicates the general existing conditions. As such, the data is not to be used for any purpose other than the intended purpose. The user is responsible for the results. The user is responsible for the application of the data to other than its intended purpose.

Data Contents

Hydrographic survey data is subject to change rapidly due to several factors including but not limited to dredging activities, changes in water levels, and other factors. The US Army Corps of Engineers accepts no responsibility for changes in the hydrographic conditions which develop after the date of the survey. The data is not to be used for any purpose other than its intended use. Prudent mariners should rely only solely upon it.
