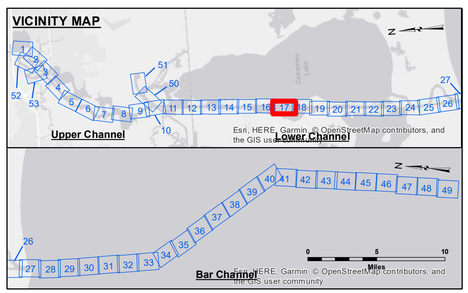
VICINITY MAP



LEGEND

- Federal Navigation Channel
- Federal Navigation Center Line
- As-built Pipeline/Cable
- Unconfirmed Pipeline/Cable
- Project Depth Contour
- Cable Area
- Placement Area
- Anchorage Area
- Obstruction Point
- Wrecks-Submerged
- 3 Fluff Thickness (feet)*
- Shoalest Sounding**
- Beacon, General
- Red Navigation Buoy
- Green Navigation Buoy
- -16' and above
- -16' to -21'
- -21' to -26'
- -26' to -33'
- -33' to -39'
- -39' to -41'
- -41' to -43'
- -43' and below

Gage Reading:	DM72: 2.35 MLLW
Sea Conditions:	ROUGH
Vessel Name:	OB189
Survey Type:	CONTROL
Sounding Frequency***:	LOW

Feet
0 400 800 1,200 1,600

NOTES:

Horizontal Coordinate System:
North American Datum of 1983 (NAD83), projected to the State Plane Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.

Vertical Datum:
Soundings are shown in feet and indicate depths below Mean Lower Low Water Datum (MLLW). Datum Relationships for gage 73615 as of December 2013:
0.0' NAVD88 (2009.55) = 1.1' MLLW = 2.1' MLG or 0.0' MLLW = 1.0' MLG

Distances on the Calcasieu River are shown at 1 mile intervals.

The location of navigation aids are base on and provided by the U.S. Coast Guard and USACE survey crews.

2015 Aerial Photography data source: NAIP

Reference is N.O.A.A. Navigation Chart No. 11339.

* Difference between high and low frequency elevations where greater than 1.0'.

** Shoalest Sounding per Quarter per Reach.

*** High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (20 kHz) survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.

US Army Corps of Engineers
District: CEMVN

DISCLAIMER
Access Constraints: The United States Government furnishes this map/chart/publication "as is" and makes no express or implied warranty concerning its accuracy, completeness, timeliness, or its suitability for any purpose. The entire risk associated with the use of this map/chart/publication is assumed by the user. In no event will the United States Government be liable for any damages resulting from any use or misuse of this map/chart/publication or from reliance on any information contained therein. The U.S. Government will not be liable for any special, indirect or consequential damages attributable to the use of this map/chart/publication. By downloading or using this map/chart/publication, you agree to the foregoing terms and conditions and agree that this paragraph will survive any subsequent warranty, sale, use or transfer of this map/chart/publication. Use of this map/chart/publication for navigation is strictly prohibited.

Distribution Liability: The data represents the results of data collection efforts at a point in time and under the conditions existing activity and indicates the general existing conditions. As such, it is only valid for its intended use, content, time and accuracy of the survey. The user assumes all liability for the use or misuse of any of the application of the data for other than its intended purpose.

Data Constraints: Hydrographic survey data is subject to change over time due to environmental factors such as storm damage, shoaling activity and natural abrading and scouring processes. The U. S. Government assumes no responsibility for changes occurring in the hydrographical conditions which develop after the date of publication. This data is intended for U. S. Army Corps of Engineers' internal use. Project maintained based on priority spend.
