DISCLAIMER The United States Government furnishes these data and the recipient accepts and uses them with the express understanding that the U.S. Government makes no warranties, either expressed or implied, as to the accuracy, reliability, or availability of the data for any particular purpose of the recipient. The recipient understands that the data are not used on a liability whatsoever to any person by reason of any use made therefrom. These data belong to the recipient. Therefore the recipient agrees to indemnify and hold the United States Government harmless from any and all claims, damages, and expenses that Government provided data. The recipient may not transfer these data to others without also transferring this Disclaimer.

The information depicted on this map represents the results of a study conducted by the U.S. Army Corps of Engineers. The Corps does not intend to represent the general condition existing at that time.

Distribution List: This data represents the results of a hydrographic survey conducted by the U.S. Army Corps of Engineers and indicates the general existing conditions. As such, it is only valid for its intended use, constant, time and accuracy of any of the application of the data for other than its intended purpose.

Data Contents: Hydrographic survey data is subject to change due to the dynamic nature of the waterway, the changing activity and natural shoaling and scouring processes. The U.S. Army Corps of Engineers does not intend to represent the hydrographical conditions which develop after the date of publication. This data is intended for U.S. Army Corps of Engineers internal use. Recipient maintains sole responsibility for any report it
