Gage Reading:	CAMERON: 2.36 MLLW AVG.
Sea Conditions:	2-3 FT.
Vessel Name:	MV VALENTOUR
Survey Type:	CS
Sounding Frequency***:	LOW

Feet
0 400 800 1,200 1,600

NOTES:

Horizontal Coordinate System:
North American Datum of 1983 (NAD83), projected to the State Plane Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.

Vertical Datum:
Soundings are shown in feet and indicate depths below Mean Lower Low Water Datum (MLLW). Datum Relationships for gage 73650 as of December 2013:
0.0' NAVD88 (2009.55) = 1.3' MLLW = 2.3' MLG or 0.0' MLLW = 1.0' MLG

Distances on the Calcasieu River are shown at 1 mile intervals.

The location of navigation aids are base on and provided by the U.S. Coast Guard and USACE survey crews.

2015 Aerial Photography data source: NAIP

Reference is N.O.A.A. Navigation Chart No. 11339.

* Difference between high and low frequency elevations where greater than 1.0'.

** Shoalest Sounding per Quarter per Reach.

*** High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (20 kHz) survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.

US Army Corps of Engineers
District: CEMVN

DISCLAIMER
Access Constraints: The United States Government furnishes this map and the data contained therein as a public service with the understanding that the US Government makes no warranties, expressed or implied concerning the accuracy, completeness, reliability, or suitability of this information for any purpose. The use of this information and the data furnished. The United States shall be under no liability whatsoever to any individual or group using this map or the data made thereof. These data belong to the Government. Therefore the recipient fully agrees not to represent these data to anyone as other than Government data. The recipient shall not transfer to others any of these data to others without also transferring this Disclaimer.

Distribution Liability: The data represents the results of data collection and processing activities conducted by the Corps of Engineers and indicates the general existing conditions. As such, it is only valid for its intended use, content, time and accuracy. The Government assumes no liability for any decisions made or actions taken by any party as the result of any of the application of the data for other than its intended purpose.

Data Constraints: Hydrographic survey data is subject to change due to environmental factors such as storms, ongoing dredging activity, and natural shoaling and scouring processes. The U. S. Army Corps of Engineers does not warrant that the data will be in the hydrographical conditions which develop after the date of publication. This data is intended for U. S. Army Corps of Engineers' internal use. Project maintained based on daily survey input.

The information depicted on this map represents the results of a survey conducted on the date indicated and can only be considered to represent the general conditions existing at that time.
