

**LEGEND**

--- Federal Navigation Channel	○ Cable Area	□ Borrow Area	■ -12' and above
— Federal Navigation Center Line	□ Placement Area	● Shoalest Sounding**	□ -12' and below
— As-built Pipeline/Cable	□ Anchorage Area	★ Beacon, General	
..... Unconfirmed Pipeline/Cable	⊗ Obstruction Point	◆ Red Navigation Buoy	
— Project Depth Contour	⚓ Wrecks-Submerged	◆ Green Navigation Buoy	

**NOTES:**

Horizontal Coordinate System:  
North American Datum of 1983 (NAD83), projected to the State Plane Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.

Vertical Datum:  
Soundings are shown in feet and indicate depths below Mean Low Gulf Datum (MLG).

Mile markers on the G.I.W.W. are shown in one mile intervals.

The location of navigation aids are base on and provided by the U.S. Coast Guard.

2017 Aerial Photography data source: NAIP, 1998 DOQQ imagery shown in green from USGS.

Reference is N.O.A.A. Navigation Chart No. 11355.

\*\* Shoalest Sounding per Quarter per Reach.

\*\*\* High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (20 kHz) survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.

Gage Reading: VRS: 2.9 MLG  
Sea Conditions: CALM  
Vessel Name: M/V OB189  
Survey Type: CONDITION  
Sounding Frequency\*\*\*: HIGH

Scale: 0 to 1,000 Feet

**Distribution Liability:** The data represents the results of data collection/processing for a specific US Army Corps of Engineers project. It is only valid for its intended use, content, time and accuracy specifications. The user is responsible for the results of their use. The application of the data for other than its intended purpose is not supported.

**Data Accuracy:** Hydrographic survey data is subject to change rapidly due to several factors including but not limited to changing hydrographic conditions when developing after the date of collection. The user is responsible for the results of their use. The Army Corps of Engineers accepts no responsibility for changes in the hydrographic conditions when developing after the date of collection. The user is responsible for the results of their use. The Army Corps of Engineers does not warrant the accuracy of the data for internal use. Product maintainers should not rely solely upon it.

**Access Conditions:** The United States Government furnishes these data and the recipient accepts and uses them with the express understanding that the data are not to be used for any purpose other than that for which they were collected, and that the data are not to be used for any purpose other than that for which they were collected, and that the data are not to be used for any purpose other than that for which they were collected.

**Disclaimer:** The information depicted on this map represents the results of a survey conducted under no liability whatsoever to any person by reason of any use made thereof. These data belong to the Government. Therefore, the Government makes no warranty, express or implied, for the accuracy or completeness of these data. The user is responsible for the results of their use. The Army Corps of Engineers does not warrant the accuracy of the data for internal use. Product maintainers should not rely solely upon it.
