- -12' and below

NOTES:

Horizontal Coordinate System:
North American Datum of 1983 (NAD83), projected to the State Plane Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.

Vertical Datum:
Soundings are shown in feet and indicate depths below Mean Low Gulf Datum (MLG).

Mile markers on the G.I.W.W. are shown in one mile intervals.

The location of navigation aids are base on and provided by the U.S. Coast Guard.

2017 Aerial Photography data source: NAIP, 1998 DOQQ imagery shown in green from USGS.

Reference is N.O.A. Navigation Chart No. 11355.

** Shoalest Sounding per Quarter per Reach.

*** High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (20 kHz) survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.

Gage Reading: VRN ADJUSTED TO MLG
Sea Conditions: CALM
Vessel Name: CHUSTZ
Survey Type: CONDITION
Sounding Frequency***: HIGH

Scale: 0 to 1,000 Feet

DISCLAIMER

The data represented on this map is the result of data collection for a specific US Army Corps of Engineers project. It is not intended for use for any other purpose than the one for which it was collected. The user is responsible for the accuracy, completeness, and reliability of the data. The user is also responsible for the accuracy, completeness, and reliability of the data. The user is also responsible for the accuracy, completeness, and reliability of the data.
