Gage Reading:	AMELIA VRS: 3.8 MLG AVG
Sea Conditions:	CALM
Vessel Name:	M/V OB 189
Survey Type:	CONDITION
Sounding Frequency***:	LOW

Feet: 0 — 500 — 1,000

NOTES:

Horizontal Coordinate System:
North American Datum of 1983 (NAD83), projected to the State Plane Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.

Vertical Datum:
Soundings are shown in feet and indicate depths below Mean Low Gulf Datum (MLG).

Mile markers on the G.I.W.W. are shown in one mile intervals.

The location of navigation aids are base on and provided by the U.S. Coast Guard.

2017 Aerial Photography data source: NAIP. 1998 DOQQ imagery shown in green from USGS.

Reference is N.O.A.A. Navigation Chart No. 11355.

** Shoalest Sounding per Quarter per Reach.

*** High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (20 kHz) survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.

DISCLAIMER:

Access Constraints: The United States Government furnishes these data and information on an "as is" basis. The recipient agrees that the US Government assumes no liability for the use of the information and the data furnished. The United States shall be under no liability whatsoever to any person by reason of any use made under this agreement or for any other purpose whatsoever. The recipient fully agrees not to represent these data to anyone as other than data produced by the US Government and to hold the US Government harmless from any liability which may arise from such representation. The recipient agrees to make no copies of these data without also transferring this Disclaimer.

Distribution Liability: The data represents the results of data collection efforts by the U.S. Army Corps of Engineers and indicates the general existing conditions. As such, it is only valid for its intended use, content, time and accuracy and is not to be used for navigation or for any other purpose. The U.S. Army Corps of Engineers accepts no responsibility for any application of the data for other than its intended purpose.

Data Constraints: Hydrographic survey data is subject to change over time and is representative only of the most recent survey activity and natural shoaling and scouring processes. The U. S. Army Corps of Engineers accepts no responsibility for any changes in the condition of the area or any navigation aids that may occur after publication. This data is intended for U. S. Army Corps of Engineers' internal use. Project mariners should not rely solely upon it.

The information depicted on this map represents the results of a survey conducted on the date indicated and can only be considered to represent the general condition existing at that time.
