DISCLAIMER:
Access Constraints: The United States Government furnishes these data and information on an "as is" basis. The recipient agrees that the US Government makes no warranties, express or implied, concerning the accuracy, completeness, reliability, or suitability of this data and information or the data and information furnished. The United States shall be under no liability whatsoever to any person by reason of any use under this agreement or with respect to any use of the data and information furnished under this agreement. The recipient fully agrees not to represent these data to anyone as other than government data. The recipient shall not release or resell these data to others without also transferring this Disclaimer.

The information depicted on this map represents the results of a survey conducted on the date indicated and can only be considered to represent the general condition existing at this time.

Distribution Liability: The data represents the results of data collection activities conducted by the U.S. Army Corps of Engineers activity and indicates the general existing conditions. As such, it is only valid for its intended use, content, time and accuracy and the U.S. Army Corps of Engineers accepts no responsibility of any of the application of the data for other than its intended purpose.

Data Constraints: Hydrographic survey data is subject to change due to environmental conditions such as storm events, biological activity, and natural shoaling and scouring processes. The U. S. Army Corps of Engineers accepts no responsibility for changes in the condition of the data after the date and time of this publication. This data is intended for U. S. Army Corps of Engineers' internal use. Private or commercial should not rely solely upon it.

Gage Reading: MORGAN CITY: 2.70 MLG
Sea Conditions: CALM
Vessel Name: OB 167
Survey Type: CONDITION
Sounding Frequency***: HIGH

Feet
0 500 1,000

NOTES:

Horizontal Coordinate System:
North American Datum of 1983 (NAD83), projected to the State Plane Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.

Vertical Datum:
Soundings are shown in feet and indicate depths below Mean Low Gulf Datum (MLG). Datum Relationships for Lower Atchafalaya River at Morgan City (03780) as of 2017: 0.0' NAVD88 (2009.55) = 1.89' MLG

The location of navigation aids are base on and provided by the U.S. Coast Guard.

2015 Aerial Photography data source: NAIP. 1998 DOQQ imagery shown in green from USGS.

Reference is N.O.A.A. Navigation Chart No. 11355.

** Shoalest Sounding per Quarter per Reach.

*** High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (20 kHz) survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.
