DISCLAIMER The United States Government neither endorses nor disendorses the data and the recipient accepts them with the express understanding that the U.S. Government makes no warranties, either expressed or implied, as to the accuracy, reliability, or usability of any particular portion of the data. The recipient understands that the data are not suitable for use without further validation and that the recipient assumes all liability whatsoever to any person by reason of any use made thereof. These data belong to the Government. Therefore the recipient agrees to return these data to the Government upon request and that the Government provided data. The recipient may not transfer these data to others without the prior consent of this disclaimer.

The information depicted on this map represents the results of a study conducted by the U.S. Army Corps of Engineers. It is not intended to represent the general condition existing at that time.

Distribution List: The data represent the results of a hydrographic survey conducted by the U.S. Army Corps of Engineers and indicate the general existing conditions. As such, it is only valid for its intended use, current time and intended purpose. The data are not intended to be used for any other type of any of the application of the data for other than its intended purpose.

Data Contents: Hydrographic survey data is subject to change over time. The data is not intended to be used for any other activity and natural shoaling and scouring processes. The U.S. Army Corps of Engineers does not warrant the data. The data is not intended to be used for any other activity than the one for which it was published. This data is intended for U.S. Army Corps of Engineers personnel use. Product maintains status of U.S. Army Corps of Engineers.
