

NOTES:
Horizontal Coordinate System: North American Datum of 1983 (NAD83), projected to the State Plane Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.

Vertical Datum: Soundings are shown in feet and indicate depths below Mean Low Gulf Datum (MLG).

Mile markers on the G.I.W.W. are shown in one mile intervals.

The location of navigation aids are base on and provided by the U.S. Coast Guard.

2010 Aerial Photography data source: NAIP, 1998 DOQQ imagery

Reference is N.O.A.A. Navigation Chart No. 11348.

** Shoalest Sounding per Quarter per Reach.

*** High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (20 kHz) survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.

Revision Number:
3.8.0-20150202

US Army Corps of Engineers District: CEMVN

DISCLAIMER
The data represents the results of data collection/processing for a specific US Army Corps of Engineers activity and indicates the general existing conditions, as such. The data is not necessarily accurate or complete for any particular purpose. The user is responsible for the results of any use made of the data for other than its intended purpose. Data Constraints: Hydrographic survey data is subject to change due to several factors including but not limited to dredging operations and natural shoaling and scouring processes. The information depicted on this map represents the results of a survey conducted on this date and can only be considered to represent the general condition existing at that time. This data is intended for U.S. Army Corps of Engineers internal purposes. Public names shown not to be relied upon it.
