

Distribution Liability: The data represents the results of data collected by the U.S. Army Corps of Engineers. The Corps does not warrant the accuracy and reliability and indicates the general existing conditions. As such, the data is only valid for its intended use, content, time and accuracy. The user is responsible for the results and any application of the data for other than its intended purpose.

Data Constraints: Hydrographic survey data is subject to change rapidly due to natural factors including but not limited to dredging activity and lateral shoaling and scouring processes. The U.S. Army Corps of Engineers accepts no responsibility for changes in hydrographic data. This data is intended for U.S. Army Corps of Engineers internal use. Prudent mariners should not rely solely upon it.

Federal Navigation Channel	Cable Area	Placement Area	-12' and above
Federal Navigation Center Line	Placement Area	Shoalest Sounding**	-12' to -20'
As-built Pipeline/Cable	Anchorage Area	Beacon, General	-20' to -25'
Unconfirmed Pipeline/Cable	Obstruction Point	Red Navigation Buoy	-25' to -32'
Project Depth Contour	Wrecks-Submerged	Green Navigation Buoy	-32' to -36'
			-36' and below

NOTES:
Horizontal Coordinate System:
North American Datum of 1983 (NAD83), projected to the State Plane
Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.

Vertical Datum:
Soundings are shown in feet and indicate depths below Mean Low Gulf (MLG).

Distances on the Mississippi River, above and below Head of Passes are shown at 1 mile intervals.

The location of navigation aids are base on and provided by the U.S. Coast Guard and USACE crew.

2021 Aerial Photography data source: NAIP, USDA-FSA-APFO Aerial Photography Field Office.

Reference is N.O.A.A. Navigation Chart No. 11370.

*** High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (20 kHz) survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.
