NOTES:

Horizontal Coordinate System: North American Datum of 1983 (NAD83), projected to the State Plane Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.

Vertical Datum: Soundings are shown in feet and indicate depths below Low Water Reference Plane 2007 (NAVD). Distances on the Mississippi River, above and below Head of Passes are shown at 1 mile intervals.

The location of navigation aids are base on and provided by the U.S. Coast Guard and USACE crew. 202115 Aerial Photography data source: NAIP, USDA-FSA-APFO Aerial Photography Field Office. Reference is N.O.A.A. Navigation Chart No. 11370.

** Shoalest Sounding per Quarter per Reach.

*** High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (20 kHz) survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.

Distribution Liability: The data herein, the results of data collection, and the methods used for a specific US Army Corps of Engineers activity and its intended use, content, time and accuracy, and indicates the general existing conditions. As such, it is only valid for its intended use and is not to be used for any other purpose than the specific purpose for which it was intended. Data Constraints: Hydrographic survey data is subject to change due to several factors including, but not limited to dredging and natural shoaling and scouring processes. The U.S. Army Corps of Engineers does not guarantee the accuracy of the hydrographic survey data. The data is provided "as is" and the U.S. Army Corps of Engineers makes no representations or warranties as to its accuracy, reliability, or completeness. The U.S. Army Corps of Engineers does not warrant that the data is fit for any particular purpose. The United States shall be liable only for damages resulting from the use of the data that are caused by the gross negligence or willful misconduct of the U.S. Army Corps of Engineers. The U.S. Army Corps of Engineers shall not be liable for incidental or consequential damages, including but not limited to lost profits, lost savings, or other economic losses, arising out of the use of the data. The information depicted on this map represents the results of a survey conducted on the date indicated and can only be considered to represent the general condition existing at that time.
