

LWRP:
Gage Reading: 2.7
Sea Conditions: BR:43.96 D:31.92 USED:43.6 NGVD
Vessel Name: CALM
Survey Type: OB-189
Sounding Frequency***: CONDITION
NOTES:
Horizontal Coordinate System: North American Datum of 1983 (NAD83), projected to the State Plane Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.
Vertical Datum: Soundings are shown in feet and indicate depths below Low Water Reference Plane 2007 (NGVD).
Distances on the Mississippi River, above and below Head of Passes are shown at 1 mile intervals.
The location of navigation aids are base on and provided by the U.S. Coast Guard and USACE crew.
2015 Aerial Photography data source: NAIP, USDA-FSA-APFO Aerial Photography Field Office.
Reference is N.O.A.A. Navigation Chart No. 11370.

*** High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (20 kHz) survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.

DISCLAIMER
Accurate Constants: The United States Government furnishes the data and the recipient accepts and uses them with the express understanding that the U.S. Government makes no warranties, representations or guarantees as to the accuracy and reliability of such data and is not responsible for its results. The user assumes responsibility for the use and application of the data for other than its intended purpose.
Data Constraints: Hydrographic survey data is subject to change rapidly due to several factors including but not limited to dredging activity, new structures, subsidence, and changes in the hydrographic conditions which develop after the date of publication. This data is intended for U.S. Army Corps of Engineers internal use. Private users should not rely upon it.
Information depicted on this map represents the results of a survey conducted on the date indicated and can only be considered to represent the general condition existing at that time.
