

DISTRIBUTION LIABILITY: The data represents the results of data collection processing of a specific US Army Corps of Engineers active and inoperative structures and uses them with the express understanding that the US Government takes no warranties, representations, or liability for its use. It is the responsibility of the user to determine the suitability of the data for their intended purpose. The user is responsible for the results of any application of the data for other than its intended purpose.

DATA CONDITIONS: Hydrographic data is subject to change rapidly due to several factors including but not limited to dredging and natural abrasion and scouring processes over time. As such, the data is intended for U.S. Army Corps of Engineers internal use. Please submit a formal request for the latest hydrographic conditions which develop after the date of publication.
