

Distribution liability: The data represents the results of data collection/processing by a specific US Army Corps of Engineers activity and includes the general existing conditions. As such, the data is provided "as is" and the user assumes all risk for its use. The user is responsible for the proper use of the data and its intended purpose. Data Constraints: Hydrographic surveying is subject to change rapidly due to several factors including but not limited to dredging activities and natural shoaling and scouring processes. The U.S. Army Corps of Engineers shall not be liable for damages resulting from the use of the data under any circumstances. The United States shall not be under any liability whatsoever to any person by reason of any use made of the data or information contained therein. The user agrees to indemnify the Government for any claim arising out of the use of the data or information contained therein. The user agrees to not transfer the data to other persons without also transferring this Disclaimer. The information depicted on this map represents the results of a survey conducted on the date indicated and cannot be considered to depict the general condition existing at that time. It is the responsibility of the surveyor to update the map after the survey is completed. The data is intended for U.S. Army Corps of Engineers internal uses. Private and commercial users should not rely on it.

U.S. ARMY CORPS OF ENGINEERS	
NEW ORLEANS DISTRICT	
Surveyed By:	RYLAND ISOUKI

LEGEND	
— Federal Navigation Channel	○ Cable Area
— Federal Navigation Center Line	■ Placement Area
— As-built Pipeline/Cable	□ Anchorage Area
..... Unconfirmed Pipeline/Cable	★ Beacon, General
— Project Depth Contour	⊗ Obstruction Point
	◆ Red Navigation Buoy
	◆ Green Navigation Buoy
	✗ Wrecks-Submerged

NOTES:

Horizontal Coordinate System: North American Datum of 1983 (NAD83), projected to the State Plane Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.

Vertical Datum: Soundings are shown in feet and indicate depths below Low Water Reference Plane 2007 (NAVD). Distances on the Mississippi River, above and below Head of Passes are shown at 1 mile intervals.

The location of navigation aids are base on and provided by the U.S. Coast Guard and USACE crew.

2015 Aerial Photography data source: NAIP, USDA-FSA-AFPO Aerial Photography Field Office.

Reference is N.O.A.A. Navigation Chart No. 11370.

** Shoal sounding per Quarter per Reach.

*** High frequency (20 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (20 kHz) survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.
