

LWRP: 2.4  
Gage Reading: BR:19.6 D:11.7 USED:18.3 NGVD  
Sea Conditions: CALM  
Vessel Name: 189  
Survey Type: CONDITION  
Sounding Frequency\*\*\*: HIGH

**NOTES:**

North American Datum of 1983 (NAD83), projected to the State Plane Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.

Vertical Datum: Soundings are shown in feet and indicate depths below Low Water Reference Plane 2007 (NGVD).

Distances on the Mississippi River, above and below Head of Passes are shown at 1 mile intervals.

The location of navigation aids are base on and provided by the U.S. Coast Guard and USACE crew.

2010 Aerial Photography data source: NAIP, USDA-FSA-APFO Aerial Photography Field Office.

Reference is N.O.A.A. Navigation Chart No. 11370.

\*\* Shoal sounding per Quarter per Reach.

\*\*\* High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (20 kHz) survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.

Distribution liability: The data represents the results of data collection/processing for a specific US Army Corps of Engineers activity and includes the general existing conditions. Such activities are not surveys of land or water areas. The user is responsible for the results of any application of the data for other than its intended purpose.

Data Constraints: Hydrographic survey data is subject to change due to several factors including but not limited to dredging activity and natural shoals and currents processes. The U.S. Army Corps of Engineers does not warrant the data for use in hydrographic conditions which develop after the date of publication. This data is intended for U.S. Army Corps of Engineers use and shall not be sold to third parties without the express written consent of the U.S. Army Corps of Engineers.

This information depicts on the map represents the results of a survey conducted on the date indicated and can only be considered to represent the general condition existing at that time.
