

DISCLAIMER Access Constraints: The United States Government furnishes this information as is without warranty of any kind. It expresses no opinion and does not make any representation as to the accuracy, reliability or completeness of the information and the data furnished. The United States shall be responsible for any damage resulting from the use of the information and the data furnished. This document and the data furnished by this Government provided data. The recipient may not transfer these data to others without also transferring this Disclaimer. The information depicted on this map represents the results of a survey conducted by the U.S. Army Corps of Engineers to represent the general contour existing at that time.	Distribution Statement: The data represents the results of data collection/processing for a specific U.S. Army Corps of Engineers project. The data is not to be distributed outside of the project. It is only valid for its intended use, content, time, and accuracy. The data is not to be used for any other purpose. The use of any of the application of the data for other than its intended purpose. Data Contributor: Hydrographic survey data is subject to change over time. The data is not to be used for any other purpose, activity, and natural boating and scouting purposes. The U.S. Army Corps of Engineers assumes no responsibility for changes in the data. The data is not to be used for any other purpose. The data is intended for U.S. Army Corps of Engineers publication. This data is intended for U.S. Army Corps of Engineers publication. This document represents the results of a survey conducted by the U.S. Army Corps of Engineers to represent the general contour existing at that time.

MISSISSIPPI RIVER - B.R. TO GULF
MEDORA CROSSING
MD_08_MED_20250429_CS
29 April 2025

NOTES:

Horizontal Coordinate System:
North American Datum of 1983 (NAD83), projected to the State Plane
Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.

Vertical Datum:
Soundings are shown in feet and indicate depths below Low Water Reference Plane 2007 (NAVD).

Distances on the Mississippi River, above and below Head of Passes are shown
at 1 mile intervals.

The location of navigation aids are based on and provided by the U.S. Coast Guard and USACE crew.

2021 Aerial Photography data source: NAIP, USDA-FSA-APFO Aerial Photography Field Office.

Reference is N.O.A.A. Navigation Chart No. 11370.

** Shoalest Sounding per Quarter per Reach.

*** High frequency (200 kHz) survey data represents the first signal return at a sounding
location and will include suspended solids, known as "fluff", if present. Low frequency (20 kHz)
survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom
material. Low frequency accuracies may vary depending on channel conditions and fathometer
settings.
