

**NOTES:**

Horizontal Coordinate System:
North American Datum of 1983 (NAD83), projected to the State Plane
Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.

Vertical Datum:
Soundings are shown in feet and indicate depths below Low Water Reference Plane 2007 (NAVD).
Distances on the Mississippi River, above and below Head of Passes are shown
at 1 mile intervals.

The location of navigation aids are base on and provided by the U.S. Coast Guard and USACE crew.
2015 Aerial Photography data source: NAIP, USDA-FSA-APFO Aerial Photography Field Office.
Reference is N.O.A.A. Navigation Chart No. 11370.

** Shoalest Sounding per Quarter per Reach.

*** High frequency (200 kHz) survey data represents the first signal return at a sounding
location and will include suspended solids, known as "fluff", if present. Low frequency (20 kHz)
survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom
material. Low frequency accuracies may vary depending on channel conditions and fathometer
settings.

DISTRIBUTION STATEMENT: The data represents the results of data collection processing by a specific US Army Corps of Engineers activity and relates to the general existing conditions. As such, the data is not necessarily suitable for other than its intended purpose. The user is responsible for the results of any application of the data for other than its intended purpose.
Data Constraints: Hydrographic survey data is subject to change rapidly due to several factors including but not limited to dredging and filling, shoaling and scouring processes. The data is not necessarily current. The data is intended for U.S. Army Corps of Engineers internal use. Please contact the US Army Corps of Engineers for further information. This data is intended for U.S. Army Corps of Engineers internal use. Please contact the US Army Corps of Engineers for further information.
