Distribution Liability: The data represents the results of data collection/processing for a specific US Army Corps of Engineers activity and indicates the general existing conditions. As such, the data is not necessarily accurate or complete for specific applications. The user is responsible for the results of any application of the data for other than its intended purpose.  
Data Constraints: Hydrographic survey data is subject to change rapidly due to several factors including but not limited to dredging, sandbar movement, shoals and scouring processes caused by the hydrographic conditions within which development of the survey was conducted. This data is intended for U.S. Army Corps of Engineers internal use. Public entities should rely solely upon it.
