

US Army Corps of Engineers
District: CEMVN

Distribution Liability: The data represents the results of data collection/processing by a specific US Army Corps of Engineers activity and includes the general existing conditions. As such, the United States Government makes no warranties, expressed or implied, regarding the reliability or suitability of the data for any purpose. The user is responsible for the results of its use. Specifications of the data furnished are contained in the accompanying specifications. The United States shall be under no liability whatsoever to any person who uses or relies upon the data furnished. Any person who uses or relies upon the data furnished does so at his/her own risk. The user shall indemnify and hold the United States harmless from any claims, demands, damages, costs and expenses (including attorney's fees) which may be made against the United States by any third party as a result of the user's use of the data. The user shall not transfer these data to anyone else without the Government's prior written consent. The user shall not use these data for any purpose other than that for which they were provided. The information depicted on this map represents the results of a survey conducted on the date indicated and can only be considered to represent the general condition existing at that time.

Recommended: Chief Survey Section
Approved: Chief Waterways Maintenance Section

MISSISSIPPI RIVER - B.R. TO GULF
GRANADA CROSSING
MD_10_GRA_20241203_CS
03 December 2024

LWRP: 1.9
Gage Reading: BR:8.9 D:4.2 USED:6.80 NAVD88
Sea Conditions: CALM
Vessel Name: LAFOURCHE
Survey Type: CS
Sounding Frequency***: HIGH

Horizontal Coordinate System: North American Datum of 1983 (NAD83), projected to the State Plane Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.

Vertical Datum: Soundings are shown in feet and indicate depths below Low Water Reference Plane 2007 (NAVD). Distances on the Mississippi River, above and below Head of Passes are shown at 1 mile intervals.

The location of navigation aids are base on and provided by the U.S. Coast Guard and USACE crew. 2015 Aerial Photography data source: NAIP, USDA-FSA-APO Aerial Photography Field Office.

Reference is N.O.A.A. Navigation Chart No. 11370.

** Shoalest Sounding per Quarter per Reach.

*** High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (20 kHz) survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.
