NOTES:

Horizontal Coordinate System: North American Datum of 1983 (NAD83), projected to the State Plane Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.

Vertical Datum: Soundings are shown in feet and indicate depths below Low Water Reference Plane 2007 (NAVD).

Sea Conditions: CALM

Vessel Name: M/V LAFOURCHE

Survey Type: CS

Sounding Frequency***: HIGH

LWRP: 1.9

Gage Reading: BR:32.7D:22.4 USED:28.2 NAVD

Survey Reference: N.O.A.A. Navigation Chart No. 11370.

*** High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (20 kHz) survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.

DISCLAIMED
Access Constraints: The United States Government furnishes these data and the recipient accepts them with the express understanding that the Government makes no warranty, expressed or implied, concerning the accuracy, reliability, usability or usefulness of the data furnished. The United States shall be liable only for damages resulting from its gross negligence or willful misconduct. The Government retains ownership of the data and is not liable for damages resulting from its use. The recipient agrees to indemnify and hold the Government harmless from any claims, losses, damages, or expenses resulting from its negligent use of the data. The recipient may not transfer the data to another party without the written consent of the Government.

Data Constraints: Hydrographic survey data is subject to change due to several factors including but not limited to dredging activity and natural shoaling and scouring processes. The U.S. Army Corps of Engineers does not warrant the data contained in this publication. The data is provided "as is" and is subject to change after the date of publication. This data is intended for U.S. Army Corps of Engineers internal use. Prudent mariners should not rely upon it.
