

LWRP: 1.8
Gage Reading: BR:41.1 D:31.1 USED:35.4 NAVD
Sea Conditions: STRONG CURRENT
Vessel Name: M/V LAFORCHE
Survey Type: CONDITION
Sounding Frequency***: HIGH

NOTES:
Horizontal Coordinate System: North American Datum of 1983 (NAD83), projected to the State Plane Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.
Vertical Datum: Soundings are shown in feet and indicate depths below Low Water Reference Plane 2007 (NAVD).
Distances on the Mississippi River, above and below Head of Passes are shown at 1 mile intervals.
The location of navigation aids are base on and provided by the U.S. Coast Guard and USACE crew.
2015 Aerial Photography data source: NAIP, USDA-FSA-APFO Aerial Photography Field Office.
Reference is N.O.A. Navigation Chart No. 11370.
*** Shoalest Sounding per Quarter per Reach.
*** High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (20 kHz) survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.

Distribution Liability: The data represents the results of data collection processing for a specific US Army Corps of Engineers project and is not intended for general use. It is only valid for its intended use, and the user assumes all liability for its use. The user is responsible for the results of the data, including the application of the data for other than its intended purpose. Data Constraints: Hydrographic survey data is subject to change rapidly due to several factors including but not limited to dredging, shoaling, and shifting of the channel. The user is responsible for checking the hydrographic conditions when developing the date of a project. The information depicted on this map represents the results of a field survey conducted at the time of the survey and is not intended to represent the general condition existing at that time.
