

**NOTES:**

Horizontal Coordinate System:
North American Datum of 1983 (NAD83), projected to the State Plane
Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.

Vertical Datum:
Soundings are shown in feet and indicate depths below Low Water Reference Plane 2007 (NAVD).
Distances on the Mississippi River, above and below Head of Passes are shown
at 1 mile intervals.

The location of navigation aids are base on and provided by the U.S. Coast Guard and USACE crew.
2015 Aerial Photography data source: NAIP, USDA-FSA-APFO Aerial Photography Field Office.

Reference is N.O.A.A. Navigation Chart No. 11370.

** Shoalest Sounding per Quarter per Reach.

*** High frequency (200 kHz) survey data represents the first signal return at a sounding
location and will include suspended solids, known as "fluff", if present. Low frequency (20 kHz)
survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom
material. Low frequency accuracies may vary depending on channel conditions and fathometer
settings.

Distribution liability: The data represents the results of data collection and processing by a specific US Army Corps of Engineers activity and reflects the general existing conditions as such. The user is responsible for the results of any application of the data for other than its intended purpose.

Data constraints: Hydrographic survey data is subject to change rapidly due to several factors including but not limited to dredging and filling activities, subsidence and coastal processes. The U.S. Army Corps of Engineers and the Corps of Engineers do not warrant or guarantee the accuracy of the data. The data is intended for use under no liability whatsoever by any person or entity who uses the data. The user agrees to indemnify and hold harmless the Government, provided data to anyone that transfers the data to others without so advising the Government. The recipient may transfer the data to others as he sees fit.

The information depicted on this map represents the results of a survey conducted on the date indicated and can only be considered to apply to the general condition existing at that time.
