

US Army Corps
of Engineers
District: CEMVN

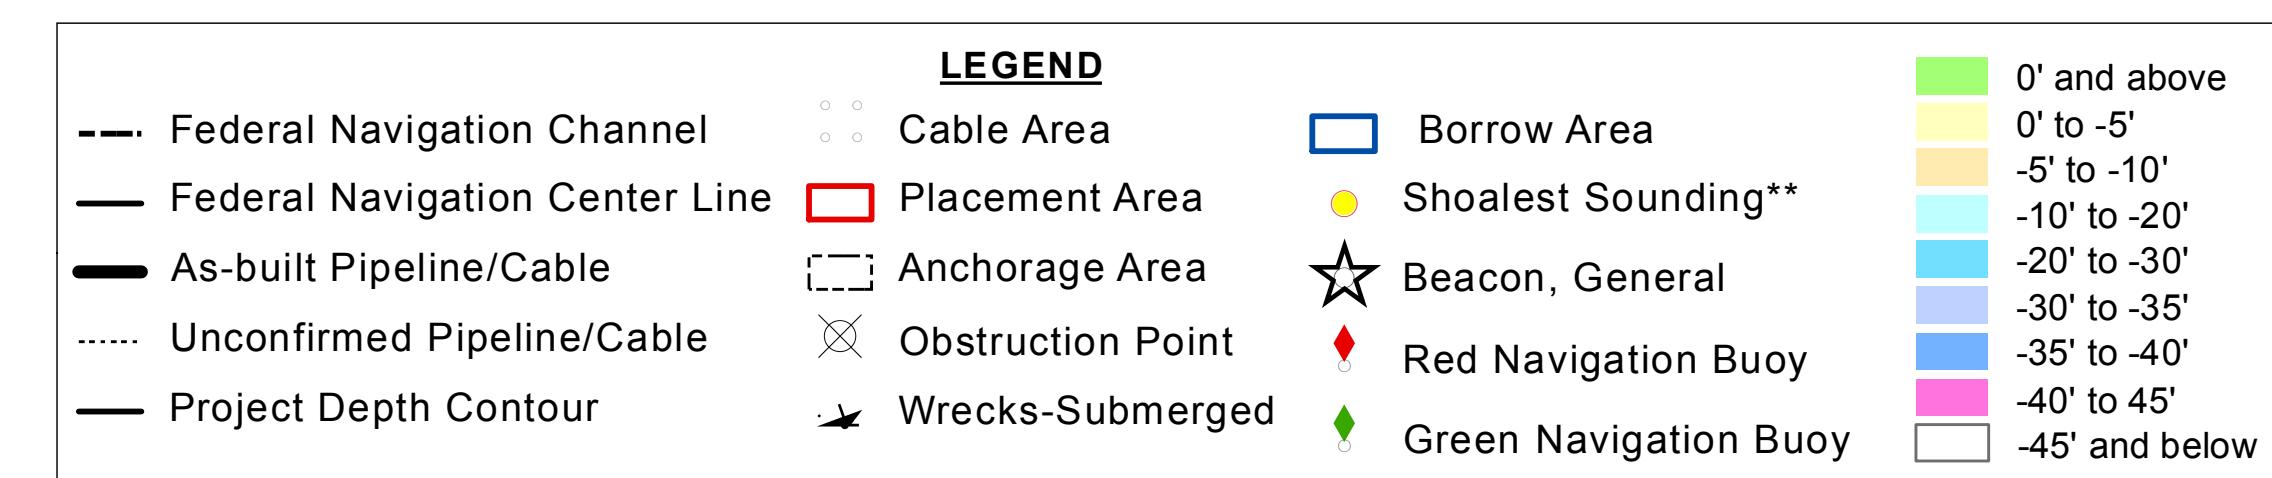

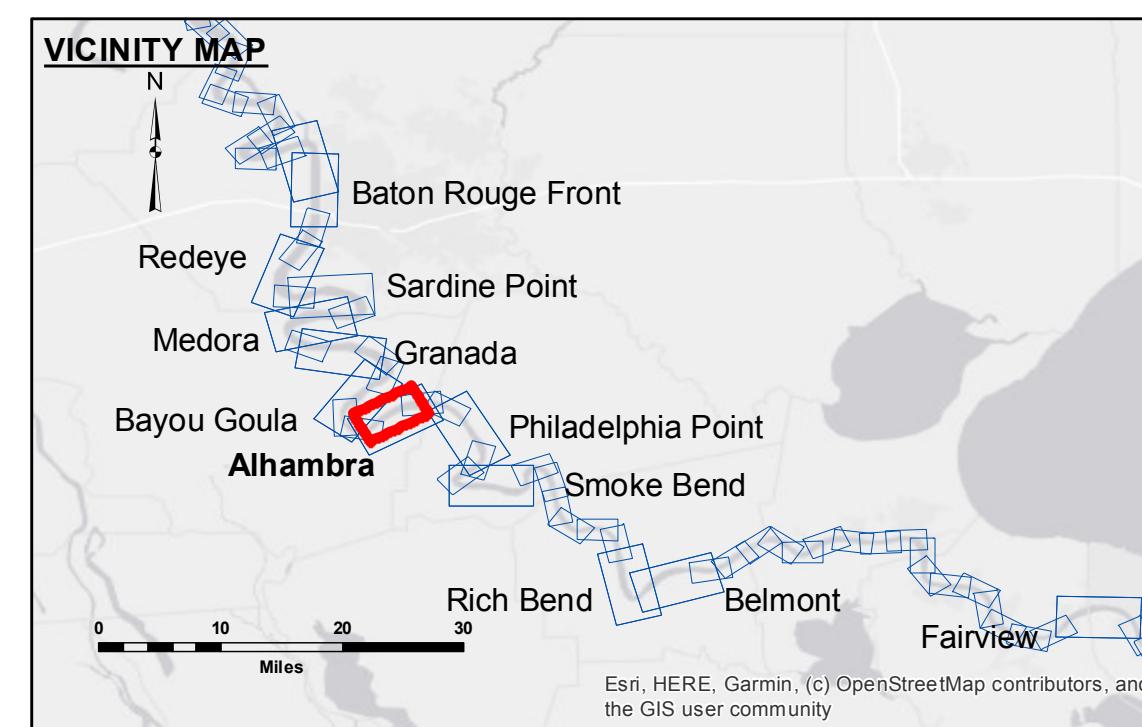

Distribution Liability: The data represents the results of data collection/processing for a specific US Army Corps of Engineers activity and indicates the general existing conditions. Such data is provided "as is" and the user assumes all risk for its use. The user is responsible for the results of any application of the data for other than its intended purpose.

Data Conditions: Hydrographic survey data is subject to change rapidly due to several factors including but not limited to dredging activities and natural shoaling and scouring processes caused by the hydrographic conditions when developing the data. The user is responsible for the results of any use of this data under no liability whatsoever to any person by reason of any use made thereon. The user shall not resell this data to anyone without the express written consent of the U.S. Army Corps of Engineers. The user agrees not to represent that the data originates from the U.S. Army Corps of Engineers or that it is developed by the U.S. Army Corps of Engineers. The user shall not use this data to others without also sending this Disclaimer.

The information depicted on this map represents the results of a survey conducted on this date indicated and can only be considered to represent the general condition existing at that time.

LWRP: 1.7
Gage Reading: BR:12.5D:7.3 USED:8.8 NAVD
Sea Conditions: CHOP
Vessel Name: OB-189
Survey Type: CONDITION
Sounding Frequency***: HIGH

Horizontal Coordinate System: North American Datum of 1983 (NAD83), projected to the State Plane Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.

Vertical Datum: Soundings are shown in feet and indicate depths below Low Water Reference Plane 2007 (NAVD). Distances on the Mississippi River, above and below Head of Passes are shown at 1 mile intervals.

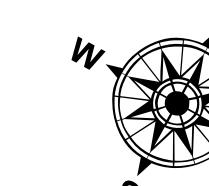

The location of navigation aids are base on and provided by the U.S. Coast Guard and USACE crew.

2015 Aerial Photography data source: NAIP, USDA-FSA-APFO Aerial Photography Field Office.

Reference is N.O.A.A. Navigation Chart No. 11370.

** Shoalest Sounding per Quarter per Reach.

*** High frequency (20 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (20 kHz) survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.
