**NOTES:**

Horizontal Coordinate System: North American Datum of 1983 (NAD83), projected to the State Plane Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.

Vertical Datum: Soundings are shown in feet and indicate depths below Low Water Reference Plane 2007 (NAVD). Distances on the Mississippi River, above and below Head of Passes are shown at 1 mile intervals.

The location of navigation aids are base on and provided by the U.S. Coast Guard and USACE crew.

2015 Aerial Photography data source: NAIP, USDA-FSA-APFO Aerial Photography Field Office.

Reference is N.O.A.A. Navigation Chart No. 11370.

\*\* Shoalest Sounding per Quarter per Reach.

\*\*\* High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (20 kHz) survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.

Distribution liability: The data represents the results of data collection/processing by a specific US Army Corps of Engineers activity and reflects the general existing conditions. Such data is provided "as is" without warranty or guarantee of fitness for a particular purpose. The user is responsible for the results of any use of the data for other than its intended purpose.

Data Conventions: Hydrographic survey data is subject to change rapidly due to several factors including but not limited to dredging and filling activities and coastal processes. The U.S. Army Corps of Engineers retains the right to change the hydrographic conditions which develop after the date of internal use. This data is intended for U.S. Army Corps of Engineers internal use. Plaintiff's attorney should not rely upon it.
