LWRP: 1.7
Gage Reading: BR:32.3 D:22.3 USED:25.40 NAVD
Sea Conditions: CALM
Vessel Name: MV LAFOURCHE
Survey Type: CS
Sounding Frequency*:** HIGH

Feet

0 500 1,000 1,500 2,000 2,500

NOTES:

Horizontal Coordinate System: North American Datum of 1983 (NAD83), projected to the State Plane Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.

Vertical Datum: Soundings are shown in feet and indicate depths below Low Water Reference Plane 2007 (NAVD).

Distances on the Mississippi River, above and below Head of Passes are shown at 1 mile intervals.

The location of navigation aids are base on and provided by the U.S. Coast Guard and USACE crew.

2015 Aerial Photography data source: NAIP, USDA-FSA-APFO Aerial Photography Field Office.

Reference is N.O.A.A. Navigation Chart No. 1130.

** Shoal sounding per Quarter per Reach.

*** High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (20 kHz) survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.

Sheet Reference Number

Revision Number:
4.2-200420

DISTRIBUTION LIABILITY: The data represents the results of data collection processing by a specific US Army Corps of Engineers active and indirect the general existing conditions. As such, the United States Government makes no warranty or guarantee as to the accuracy, reliability, or completeness of the data or information and the data furnished. The United States shall be under no liability whatsoever for any use of or reliance upon the data or information. The user is responsible for the results of any application of the data for other than its intended purpose.

Data Constraints: Hydrographic survey data is subject to change rapidly due to several factors including but not limited to dredging and natural abrasion and scouring processes. The data is in hydrographic condition which develops over time. The data is intended for U.S. Army Corps of Engineers internal use. Please submit comments to the Data Manager.
