| | | | ■ -30' to -35' |
| | | | ■ -35' to -40' |
| | | | ■ -40' to 45' |
| | | | ■ -45' and below |

LWRP: 0.4
 Gage Reading: AG:8.8 AL:6.2 USED: 6.8 NAVD
 Sea Conditions: SMOOTH
 Vessel Name: LAFORUCHE
 Survey Type: CS
 Sounding Frequency***: HIGH

NOTES:
 Horizontal Coordinate System:
 North American Datum of 1983 (NAD83), projected to the State Plane
 Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.
 Vertical Datum:
 Soundings are shown in feet and indicate depths below Low Water Reference Plane 2007 (NAVD).
 Distances on the Mississippi River, above and below Head of Passes are shown
 at 1 mile intervals.
 The location of navigation aids are base on and provided by the U.S. Coast Guard and USACE crew.
 2017 Aerial Photography data source: NAIP, USDA-FSA-APFO Aerial Photography Field Office.
 Reference is N.O.A.A. Navigation Chart No. 11370.
 *** Shoalest Sounding per Quarter per Reach.
 *** High frequency (200 kHz) survey data represents the first signal return at a sounding
 location and will include suspended solids, known as "fluff", if present. Low frequency (20 kHz)
 survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom
 material. Low frequency accuracies may vary depending on channel conditions and bathymeter
 settings.

US Army Corps of Engineers District: CEMVN

Accession: The United States Government furnishes these data and the recipient accepts and uses them with the express understanding that they are not to be used for any purpose other than that for which they were prepared. The user is responsible for the results of any use of these data. The application of the data for other than its intended purpose is at the user's risk. The user is responsible for the results of any use of these data. The application of the data for other than its intended purpose is at the user's risk. The user is responsible for the results of any use of these data. The application of the data for other than its intended purpose is at the user's risk.

Distribution Liability: The data represents the results of data collection for a specific US Army Corps of Engineers project and is only valid for its intended use, contract, time and accuracy specifications. The user is responsible for the results of any use of these data. The application of the data for other than its intended purpose is at the user's risk. The user is responsible for the results of any use of these data. The application of the data for other than its intended purpose is at the user's risk. The user is responsible for the results of any use of these data. The application of the data for other than its intended purpose is at the user's risk.

Data Constraints: Hydrographic survey data is subject to change due to several factors including but not limited to changing hydrographic conditions which develop after the date of the survey. The user is responsible for the results of any use of these data. The application of the data for other than its intended purpose is at the user's risk. The user is responsible for the results of any use of these data. The application of the data for other than its intended purpose is at the user's risk. The user is responsible for the results of any use of these data. The application of the data for other than its intended purpose is at the user's risk.
