NOTES:

Horizontal Coordinate System:
North American Datum of 1983 (NAD83), projected to the State Plane Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.

Vertical Datum:
Soundings are shown in feet and indicate depths below Low Water Reference Plane 2007 (NAVD).

Distances on the Mississippi River, above and below Head of Passes are shown at 1 mile intervals.

The location of navigation aids are base on and provided by the U.S. Coast Guard and USACE crew.

2017 Aerial Photography data source: NAIP, USDA-FSA-APFO Aerial Photography Field Office.

Reference is N.O.A.A. Navigation Chart No. 11370.

** Shoalest Sounding per Quarter per Reach.

*** High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (20 kHz) survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.

District: CEMVN

DISCLAIMER
Access Constraints: The United States Government furnishes this map/chart/publication and the data contained therein "AS IS" to expedite navigation. The United States Government makes no warranties, expressed, or implied concerning the accuracy, completeness, reliability, or suitability of this information for any particular purpose. The fact that the United States Government has furnished this information and the data furnished shall be used only by those possessing the necessary expertise to understand its limitations and to make proper use thereof. No responsibility is assumed by the United States Government for any damages resulting from its use. Any user of this information shall hold the United States Government harmless from any liability arising from such use. These data belong to the Government. Therefore the recipient fully agrees not to represent these data to anyone as other than Government data. In no event shall the United States Government be used in any way to imply endorsement of any private product made from these data. Therefore the recipient shall not use these data to state or imply that the United States Government endorses his product or organization. In addition, the recipient agrees not to resell or transfer these data to others without also transferring this Disclaimer.

Distribution Liability: The data represents the results of data collection and analysis performed by the Corps of Engineers activity and indicates the general existing conditions. As such it is only valid for its intended use, content, time and accuracy of the survey. The Corps of Engineers is not liable for misuse of any of the application of the data for other than its intended purpose.

Data Constraints: Hydrographic survey data is subject to change due to environmental conditions such as storms, sediment transport activity, and natural shoaling and scouring processes. The U. S. Army Corps of Engineers assumes no responsibility for changes in the hydrographic conditions which develop after the date given in the publication. This data is intended for U.S. Army Corps of Engineers' internal use. Private reviewers should use only publicly sourced data.

The information depicted on this map represents the results of a survey conducted on the date indicated and can only be considered to represent the general conditions existing at that time.
