Gage Reading:	CATFISH POINT: 3.5 MLG
Sea Conditions:	CALM
Vessel Name:	OB-189
Survey Type:	CS
Sounding Frequency***:	LOW

Feet
0 500 1,000

NOTES:

Horizontal Coordinate System:
North American Datum of 1983 (NAD83), projected to the State Plane Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.

Vertical Datum:
Soundings are shown in feet and indicate depths below Mean Low Gulf Datum (MLG).

The location of navigation aids are base on and provided by the U.S. Coast Guard.

2015 Aerial Photography data source: NAIP. 1998 DOQQ imagery shown in green from USGS.

Reference is N.O.A.A. Navigation Chart No. 11344 and 11348.

** Shoalest Sounding per Quarter per Reach.

*** High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (20 kHz) survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.

US Army Corps of Engineers
District: CEMVN

DISCLAIMER:
Access Constraints: The United States Government furnishes these data and the US Government assumes no liability except as expressed, or implied concerning the accuracy, completeness, reliability, usability, or suitability for any particular purpose of the information and the data furnished. The United States shall be under no liability whatsoever to any person by reason of any use made thereof, and it is agreed that the recipient assumes all liability arising from its use of the data furnished hereunder. The recipient fully agrees not to represent these data to anyone as other than data produced by the US Government and to indemnify the US Government from any liability resulting from the dissemination of these data to others without also transferring this Disclaimer.

Distribution Liability: The data represents the results of data collection and analysis performed by the Corps of Engineers activity and indicates the general existing condition. As such, it is only valid for its intended use, content, time and accuracy requirements. Data is not to be used for navigation or for any other purpose of any of the application of the data for other than its intended purpose.

Data Constraints: Hydrographic survey data is subject to change over time and must be interpreted within the context of human activity and natural shoaling and scouring processes. The U. S. Army Corps of Engineers accepts no responsibility for interpretations of this data by others and does not guarantee the soundings in this publication. This data is intended for U. S. Army Corps of Engineers' internal use. Private or commercial use of this data is prohibited.

The information depicted on this map represents the results of a survey conducted on the date indicated and can only be considered to represent the general condition existing at this time.
