Gage Reading:	VRN CATFISH: 2.9 MLG
Sea Conditions:	CALM
Vessel Name:	OB169
Survey Type:	CONDITION
Sounding Frequency***:	LOW

Feet
0 500 1,000

NOTES:

Horizontal Coordinate System:
North American Datum of 1983 (NAD83), projected to the State Plane Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.

Vertical Datum:
Soundings are shown in feet and indicate depths below Mean Low Gulf Datum (MLG).

The location of navigation aids are base on and provided by the U.S. Coast Guard.

2017 Aerial Photography data source: NAIP. 1998 DOQQ imagery shown in green from USGS.

Reference is N.O.A.A. Navigation Chart No. 11344 and 11348.

** Shoalest Sounding per Quarter per Reach.

*** High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (20 kHz) survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.

DISCLAIMER
Access Constraints: The United States Government furnishes this data and has no liability to any recipient. The recipient understanding that the US Government makes no warranties, expressed, or implied concerning the accuracy, completeness, reliability, or suitability of this data, of its use, or of any of the information and the data furnished. The United States shall be held harmless from any liability resulting from improper use made thereof. These data belong to this Government. Therefore the recipient fully agrees not to represent these data to anyone as other than data received from the Government. The recipient shall not release these data to others without also transferring this Disclaimer.

Distribution Liability: The data represents the results of data collection and processing at the time of survey. It is current as of the survey activity and indicates the general existing conditions. As such, it is only valid for its intended use, content, time and accuracy and is not to be used for navigation purposes. The U.S. Government assumes no responsibility for any use of the data or of any of the application of the data for other than its intended purpose.

Data Constraints: Hydrographic survey data is subject to change due to natural and man-induced events. Due to the dynamic nature of coastal and inland waterways, depths may change after the date of survey activity and natural shoaling and scouring processes. The U. S. Army Corps of Engineers accepts no responsibility for changes in the condition of the project area which may occur subsequent to publication. This data is intended for U. S. Army Corps of Engineers' internal use. Private commercial uses of this data may exist.

The information depicted on this map represents the results of a survey conducted on the date indicated and can only be considered to represent the general conditions existing at the time.
