NOTES:
Horizontal Coordinate System:
North American Datum of 1983 (NAD83), projected to the State Plane
Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.

Vertical Datum:
Soundings are shown in feet and indicate depths below Low Water Reference Plane 2007 (NGVD).
Distances on the Mississippi River, above and below Head of Passes are shown
at 1 mile intervals.

The location of navigation aids are base on and provided by the U.S. Coast Guard and USACE crew.
2010 Aerial Photography data source: NAIP, USDA-FSA-APFO Aerial Photography Field Office.
Reference is N.O.A.A. Navigation Chart No. 11370.

** Shoalest Sounding per Quarter per Reach.

*** High frequency (200 kHz) survey data represents the first signal return at a sounding
location and will include suspended solids, known as "fluff", if present. Low frequency (20 kHz)
survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom
material. Low frequency accuracies may vary depending on channel conditions and fathometer
settings.

Distribution liability: The data represents the results of data collection and processing by a specific US Army Corps of Engineers activity and indicates the general existing conditions. Such data is not necessarily accurate or complete for the intended purposes. The user is responsible for the results of any use of any of the application of the data for other than its intended purpose.

Data Constraints: Hydrographic survey data is subject to change rapidly due to severe events including but not limited to dredging activities and natural shoaling and scouring processes. The U.S. Army Corps of Engineers does not warrant the data in the hydrographic conditions when developed after the date of publication. This data is intended for U.S. Army Corps of Engineers use and shall not be sold to third parties without the express written consent of the U.S. Army Corps of Engineers.

This information depicts the results of a survey conducted under contract to the U.S. Army Corps of Engineers. The survey was performed by [Surveyor's Name] on [Survey Date]. The survey was conducted in accordance with the [Survey Methodology]. The surveyor has checked the survey data for quality control and found it to be acceptable for the intended purpose. The surveyor is responsible for the accuracy of the survey data.
