Horizontal Coordinate System:
American Datum of 1983 (NAD83), projected to the State Plane
Coordinate System (SPCS) Louisiana South Zone. Distance units in U.S. Survey Feet.

al Datum:
lings are shown in feet and indicate depths below Low Water Reference Plane 2007 (NGVD).
ances on the Mississippi River, above and below Head of Passes are shown
ite intervals.

cation of navigation aids are base on and provided by the U.S. Coast Guard and USACE crew.

Aerial Photography data source: NAIP, USDA-FS

lance is N.O.A.A. Navigation Chart No. 11370.
allest Sounding per Quarter per Reach.

High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (20 kHz) survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.
