Distribution liability: The data represents the results of data collection/processing for a specific US Army Corps of Engineers activity and indicates the general existing conditions, such as, water levels, bathymetry, and other information. The data is not necessarily accurate or complete and is not intended for navigation. The user is responsible for the results of any application of the data for other than its intended purpose.

Data constraints: Hydrographic survey data is subject to change rapidly due to several factors including but not limited to dredging activities and natural shoaling and scouring processes. The U.S. Army Corps of Engineers does not warrant the data for use in hydrographic conditions which develop after the date of publication. This data is intended for U.S. Army Corps of Engineers internal use. Please contact the U.S. Army Corps of Engineers for more information.
